PREFACE

The wave of liberalization and globalization has created an environment for free flow of information and technology through fast and efficient means the world over. This has lead to shrinking of world, bringing people from different cultures and environment together, giving rise to a global village. A shift has been taking place in India from closed economy to knowledge based and opens economy. In order to copeup with the challenges of handling new technologies, materials and methods, we have to develop human resources having appropriate knowledge, professional skills and attitude. Technical education system is one of the significant components for human resource development. Polytechnics play an important role in meeting the requirements of trained technical manpower for industries and field organizations. The initiatives being taken by to revise the curriculum as per the needs of the industry are laudable.

In order to meet the requirements of future technical manpower, constant efforts have to be made to identify new employment opportunities, carryout activity analysis anddesign need based curricula of diploma programmes. This curriculum document has been designed by identifying job potential and competency profile of diploma holders leading to identification of curriculum areas for the course. It is needless to emphasize that the real success of the diploma programme depends upon its effective implementation. This will require harnessing and effective utilization of resources. In addition to acquisition of appropriate physical resources, the availability of competent and qualified faculty is essential. It is time for the managers of technical education system to reorganize the system to accept the challenges of both quantitative and qualitative expansion of technical education.

There are various online training facilities created by the Government of India through MHRD for the benefit of both the Teaching and Student community. Facilities like Spoken-Tutorial, SWAYAM, NPTEL, e-Yantra must be exploited to its fullest extent to reap the benefits of interactive electronic media for teaching-learning process. It is hoped that polytechnics will carry out job market research on a continuous basis to identify the new skill requirements and develop innovative methods of course offering and thereby infuse dynamism in the system.

PRINCIPAL & CHAIRMAN

ACKNOWLEDGEMENTS

We gratefully acknowledge the assistance and guidance received from the followingpersons:

- i. Commissioner and Principal Secretary, Directorate of Technical Education, Govt. of Tamil Nadu.
- ii. Principal & Chairman, Seshasayee Institute of Technology, Trichy for initiating this project on designing of curriculum.
- iii. Dr.K.Ramakrishnan, Senior Assistant professor, School of Civil Engineering and Technology, SASTRA(Deemed to be University), Thanjavur., Mr.M.Jeevanandham M.E, HOD, Department of Civil Engineering, Government polytechnic college, Srirangam, Trichy., Mr.R.Vetrivel M.Tech, FIV, MISTE Government approved Structural Engineer, Rockcity builders, Anna nagar, Thennur, Trichy-17 for their professional inputs and support in the design of this curriculum.
- iv. All the faculty members of the Civil Engineering department for their sustained effort and support in the design of this curriculum and documentation.

Coordinator

1. DEPARTMENT VISION. MISSION .PO and PEOs

THE VISION AND MISSION OF THE DEPARTMENT

VISION:

To impart knowledge and excellence that brings out civil engineers with high technical competencies and promotes professional assignments to meet the current and future challenges in civil engineering.

MISSION:

- To promote activities that cultivates the spirit of entrepreneurship to the students.
- To impart quality education with moral values in emerging areas of employability skill.
- To create, disseminate and integrate knowledge of engineering, science and technology that expands the civil and environmental engineering knowledge base, which in turn enables the betterment of human society.
- To enrich and enhance the knowledge base for the best practices in various areas of Civil & allied Engineering
- To create competent professionals who are trained in the design and development of civil engineering systems and contribute towards need of industry requirements.

PROGRAM EDUCATIONAL OBJECTIVES:

- Students function effectively as civil engineering professional in industry, government or other organizations–designing, improving, leading and implementing efficient civil engineering practices.
- To inculcate in students professional and ethical attitude, effective communication skills and team work to become a successful Entrepreneur.
- To promote lifelong self learning abilities for gaining multidisciplinary knowledge through projects and industrial training to meet the social needs.

LIST OF PROGRAM OUTCOMES:

- Basic and Discipline specific knowledge: Apply knowledge of basic mathematics, science and engineering fundamentals and engineering specialization to solve the engineering problems.
- Problem analysis: Identify and analyze well-defined engineering problems using codified standard methods.
- Design/ development of solutions: Design solutions for well-defined technical problems and assist with the design of systems components or processes to meet specified needs.
- Engineering Tools, Experimentation and Testing: Apply modern engineering tools and appropriate technique to conduct standard tests and measurements.
- Engineering practices for society, sustainability and environment: Apply appropriate technology in context of society, sustainability, environment and ethical practices.
- Project Management: Use engineering management principles individually, as a team member or a leader to manage projects and effectively communicate about well-defined engineering activities.
- Life-long learning: Ability to analyze individual needs and engage in updating in the context of technological changes.

Program Specific Outcomes (PSOs):

- The Graduates of this program with proficiency in Structural Design and drawing which will excel in the core areas of structural Design in civil Engineering.
- The Graduates of this Programme with proficiency in construction materials and technology produce detailed drawings, write specification, prepare cost estimates and prepare digital mapping and pursue higher studies in civil engineering.

2. R E G U L A T I O N S DIPLOMA COURSES IN ENGINEERING (TERM PATTERN) (Implemented from 2020- 2021) F- SCHEME (Common to all Programmes)

2.1. Description of the Course:

a. Full Time (3 years):

The Programme for the Full Time Diploma in Engineering shall extend over a period of three academic years, consisting of 6 terms* and the First Year is common to all Engineering Branches.

b. Sandwich $(3\frac{1}{2} \text{ years})$:

The Course for the Sandwich Diploma in Paper Technology shall extend over a period of three and half academic years, consisting of 7 terms* and the First Year is common to all Engineering Branches. The subjects of three years full time diploma course being regrouped for academic convenience.

During 4th and/or during 7th term the students undergo industrial training for six months. Industrial training examination will be conducted after completion of every 6 months of industrial training.

* Each term will have 16 weeks duration of study with 35 hrs. / Week for Regular Diploma Courses.

2.2. Condition for Admission:

Condition for admission to the Diploma courses shall be required to have passed in The S.S.L.C Examination of the Board of Secondary Education, Tamil Nadu.

(Or)

The Anglo Indian High School Examination with eligibility for Higher Secondary Course in Tamil Nadu.

(Or)

The Matriculation Examination of Tamil Nadu.

(Or)

Any other Examinations recognized as equivalent to the above by the Board of Secondary Education, Tamil Nadu.

Note: In addition, at the time of admission the candidate will have to satisfy certainminimum requirements, which may be prescribed from time to time.

2.1. Admission to Second year (Lateral Entry):

A pass in HSC (academic) or (vocational) courses mentioned in the Higher Secondary Schools in Tamil Nadu affiliated to the Tamil Nadu Higher Secondary Board with eligibility for University Courses of study or equivalent examination & Should have studied the following courses.

A pass in 2 Years ITI with appropriate Trade or Equivalent examination.

		H.Sc Academic	H.Sc Vocat			
			Subjects St	Industrial		
SI. No	Courses	Studied any three of the following subjects	Studied any three of the following subjects	Vocational subjects	Training Institutes Courses	
		Maths	Maths			
		Physics	Physics			
		Chemistry	Chemistry			
		Computer Science Computer S				
		Electronics	Electronics			
		Information Technology	Information		2 years course to be passed	
		Biology	Technology			
	All the	Informatics Practices	Biology	Related		
	Regular and Sandwich	Bio Technology	Informatics	Vocational		
1.		Technical Vocational	Practices	Subjects		
		subject	Bio Technology	Theory&	with	
	Dipioma	Agriculture	Technical	Practical	appropriate	
	Courses	Engineering Graphics	Vocational		Trade	
		Business Studies	subject			
		Entrepreneurship	Agriculture			
			Engineering			
			Graphics			
			Business Studies			
			Entrepreneurship			

• For the Diploma Programmes related with Engineering/Technology, the related / equivalent courses prescribed along with Practical's may also be taken for arriving the eligibility.

 Programmes will be allotted according to merit through counselling by the Principal as per communal reservation.
 Candidates who have studied Commerce Courses are not eligible for Engineering Diploma programme.

2.3 Age Limit:

No Age limit **Medium of Instruction**: English

2.4 Eligibility for the Award of Diploma:

No candidate shall be eligible for the Diploma unless he/she has undergone the prescribed course of study for a period of not less than 3/3 ½ academic years (Full Time/Sandwich), affiliated to the State Board of Technical Education and Training, Tamil Nadu, when joined in First Year and 2/2 ½ years (Full Time/Sandwich), if joined under Lateral Entry scheme in the second year and passed the prescribed examination.

The minimum and maximum period for completion of Diploma Programmes are given below:

Diploma Programmes	Minimum Period	Maximum Period			
Full Time	3 Years	6 Years			
Full Time (Lateral Entry)	2 Years	5 Years			
Sandwich	3½ Years	6½ Years			
Sandwich (Lateral Entry)	2 ¹ / ₂ Years	5½ Years			

This will come into effect from F Scheme onwards i.e. from the academic year 2020-2021.

2.5 Programmes of Study and Curriculum outline

The Programmes of study shall be in accordance with the syllabus prescribed from time to time, both in theory and practical courses.

The curriculum outline is given in Annexure – I.

2.6 Examinations:

Autonomous Examinations in all Programmes of all the terms under the scheme of examinations will be conducted at the end of each term.

The internal assessment marks for all the courses will be awarded on the basis of continuous assessment earned during the term concerned. For each course, 25 marks are allotted for internal assessment. Autonomous Examinations areconducted for 100 marks and reduced to 75.

The total marks for result are 75 + 25 = 100 Marks.

2.7 Continuous Internal Assessment:

A. For Theory Courses: The Internal Assessment marks for a total of 25 marks, which are to be distributed as follows:

i) Course Attendance:

(Award of marks for subject attendance to each subject Theory/Practical will be as per the range given below)

80% - 83%	1 Mark
84% - 87%	2 Marks
88% - 91%	3 Marks
92% - 95%	4 Marks
96% - 100%	5 Marks

i) Test:

10 Marks

Two Tests each of 2 hours duration for a total of 50 marks are to be conducted. Average of these two test marks will be taken and the marks to be reduced to:

05 Marks

The Test - III is to be the Model Examination covering all the five units and the marks obtained will be reduced to: 05 Marks

Tost	Unite	When to conduct	Mark	Durati
Test	Onits		S	on
Test I	Unit – I & Half of unit-II	End of 6 th week	50	2Hrs
Test II	Remaining Half of unit II & III	End of 12 th week	50	2Hrs
Test III	Model examination: Covering all the units.(Autonomous examinations- Question paper-pattern)	End of 16 th week	100	2Hrs

From the Academic Year 2020 – 2021 onwards.

Question Paper Pattern for the Cycle Test :(Test - I & Test- II): Part A:

Type questions (Any 4 out of 6 questions):		
4 Questions × 2 mark		08 marks
Part B:		
Type questions (Any 4 out of 6 questions):		
4 Questions × 3 marks		12 marks
Part C:		
Type questions (Either or):		
3 Questions × 10 marks		30 marks
Total		50 marks
Assignment		10 Marks
Written Assignment	-	4 marks
Multiple Choice Questions	-	3 marks
Seminar Presentation	-	3 marks
Total	-	10 Marks

05 Marks

iii) Assignment

For each course Two Assignments are to be given each for 10 marks and the average marks scored should be reduced for 4 marks.

iv) Multiple Choice Questions

For each course one MCQ test are to be given each for 30 marks and the averagemarks scored should be reduced for 3 marks.

v) Seminar Presentation

The students have to select the topics either from their course or general courses which will help to improve their grasping capacity as well as their capacity to express the subject in hand. The students will be allowed to prepare the material for the given topic using the library hour and they will be permitted to present seminar (For First and Second Year, the students will be permitted to present the seminar as a group not exceeding six members and each member of the group should participate in the presentation. For the Third Year, the students should present the seminar individually.) The seminar presentation is mandatory for all theory courses and carries 3 marks for each theory course. The respective course faculty may suggest topics to the students and will evaluate the submitted materials and seminar presentation. (1 $\frac{1}{2}$ marks for the material submitted in writing and 1 $\frac{1}{2}$ marks for the seminar presentation). For each subject minimum of two seminars are to be given and the average marks scored should be reduced to 3 marks.

All Test Papers, Assignment Papers / Notebooks and the seminar presentation written material after getting the signature with date from the students must be keptin safe custody in the department for verification and audit. It should be preserved for one term after publication of Board Exam results and produced to the flying squad and the inspection team at the time of inspection/verification.

For Practical Subjects:

Attendance

The Internal Assessment mark for a total of 25 marks which are to be distributed as follows:-

(Award of marks same as theory subjects)b. Procedure/ observation and tabulation/Other Practical related Work :

- b. Procedure/ observation and tabulation/Other Practical related Work :10 Marks
- c. Record writing

TOTAL

а

: 10 Marks

3 Marks

3 Marks

4 Marks

:5 Marks

: 25 Marks

• All the Experiments/Exercises indicated in the syllabus should be completed and the same to be given for final Board examinations.

• The observation note book / manual should be maintained for 10 marks. The observation note book / manual with sketches, circuits, programme, reading and calculation written by the students manually depends upon the practical subject during practical classes should be evaluated properly during the practical class hours with date.

• The Record work for every completed exercise should be submitted in the subsequent practical classes and marks should be awarded for 10 marks for each exercise as per the above allocation.

• At the end of the term, the average marks of all the exercises should be calculated for 20 marks (including Observation and Record writing) and the marks awarded for attendance is to be added to arrive at the internal assessment mark for Practical. (20+5=25 marks).

• Only regular students, appearing first time have to submit the duly signed bonafide record note book/file during the Practical Board Examinations.

Education:

The Communication Skill Practical and Computer Application Practical with more emphasis are being introduced in First Year. Much Stress is given to increase the Communication skill and ICT skill of students. As per the recommendation of MHRD and under Fit India scheme, the Physical education is introduced to encourage students to remain healthy and fit by including physical activities and sports.

2.8 Project Work and Internship:

The students of all the Diploma Programme have to do a Project Work as part of the Curriculum and in partial fulfillment for the award of Diploma by the State Board of Technical Education and Training, Tamil Nadu. In order to encourage students to do worthwhile and innovative projects, every year prizes are awarded for the best three projects i.e. institution wise, region wise and state wise. The Project work must be reviewed twice in the same term. The project work is approved during the V term by the properly constituted committee with guidelines.

a) Internal assessment mark for Project Work & Internship:

Project Review I	10 Marks
Project Review II	10 Marks
Attendance	05Marks (Award of marks same as theory subject pattern)
Total	25 Marks

Proper record should be maintained for the two Project Reviews and preserved for one term after the publication of Board Exams results. It should be produced to theflying squad and the inspection team at the time of inspection/verification.

b) Allocation of Marks for Project Work & Internship in Board Examinations:

Demonstration/Presentation	25 marks
Report	25 marks
Viva Voce	30 marks
Internship Report	20 marks
TOTAL	100* MARKS
*= : :: :!!! ! ! ! ! ! ! ! ! ! !	

*Examination will be conducted for 100 marks and will be converted to 75 marks.

c) Internship Report:

The internship training for a period of two weeks shall be undergone by every candidate at the end of IV / V term during vacation. The certificate shall be produced along with the internship report for evaluation. The evaluation of internship training shall be done along with final year "Project Work & Internship" for 20 marks. The internship shall be undertaken in any industry / Government or Private certified agencies which are in social sector / Govt. Skill Centres / Institutions / Schemes.

A neatly prepared PROJECT REPORT as per the format has to be submitted by individual student during the Project Work & Internship Boardexamination.

2.9 Scheme of Examinations:

The Scheme of examinations for courses is given in Curriculum outline

2.10. Criteria for Pass:

• No candidate shall be eligible for the award of Diploma unless he/she has

undergone the prescribed course of study successfully in an institution approved by AICTE and affiliated to the State Board of Technical Education & Training, TamilNadu and pass all the subjects prescribed in the curriculum.

• A candidate shall be declared to have passed the examination in a course if he/she secures not less than 40% in theory subjects and 50% in practical subjects out of the total prescribed maximum marks including both the Internal Assessment and the Autonomous Examinations marks put together, course to the condition that he/she secures at least a minimum of 40 marks out of 100 marks in the Autonomous Theory Examinations and a minimum of 50 marks out of 100 marks in the Autonomous Practical Examinations.

2.11 Classification of successful candidates:

Classification of candidates who will pass out the final examinations from April 2023 onwards (Joined first year in 2020 -2021) will be done as specified below.

First Class with Superlative Distinction:

A candidate will be declared to have passed in **First Class with Superlative Distinction** if he/she secures not less than 75% of the marks in all the courses and passes all the terms in the first appearance itself and passes all courses within the stipulated period of study 2 / 3 / $3\frac{1}{2}$ years [Full time (lateral entry)/Full Time/Sandwich] without any break in study.

First Class with Distinction:

A candidate will be declared to have passed in **First Class with Distinction** if he/she secures not less than 75% of the aggregate marks in all the terms put together and passes all the terms except the I and II term in the first appearance

itself and passes all courses within the stipulated period of study 2 / 3 / 3½ years [Full time(lateral entry)/Full Time/Sandwich] without any break in study.

First Class:

A candidate will be declared to have passed in *First Class* if he/she secures not less than 60% of the aggregate marks in all the terms put together and passes all the courses within the stipulated period of study $2/3/3^{1/2}$ years [Full time(lateral entry)/Full Time/Sandwich] without any break in study.

Second Class:

All other successful candidates will be declared to have passed in **Second Class**. The above classifications are also applicable for the Sandwich students who pass out Final Examination from October 2023 /April 2024 onwards (both joined First Year in 2020 -2021).

2.12. Duration of a period in the Class Time Table:

The duration of each period of instruction is 1 hour and the total period of instruction hours excluding interval and lunch break in a day should be uniformly maintained as 7 hours corresponding to 7 periods of instruction (Theory & Practical).

----*----

SALIENT FEATURES OF THE DIPLOMA PROGRAMME IN CIVIL ENGINEERING

1.	Name of the Programme	:	Diploma in Civil Engineering
2.	Duration of the Programme	:	Three years
3.	Entry Qualification	:	S.S.L.C or prescribed by Directorate Technical Education and Lateral Entry in Second Year Admission for Plus-two Students.
4.	Intake	:	60+12
5.	Pattern of the Programme	:	Term Pattern(I to VI)
6.	Ratio between Theory & Practical	:	50:50(Approx.)

EMPLOYMENT OPPORTUNITIES

Employment opportunities for diploma in Civil Engineering are visualized in following industrial at various levels / positions.

a. In Govt. Sectors -

PWD (Buildings, Irrigation), CPWD

Housing Board,

State Highways, National Highways

Railways,

TWAD Board,

Environmental and Pollution Control board

Slum clearance board

Police Housing Department

Telecommunication

Electricity Board

b. In Pvt. Sectors -

- Larsen & Turbo Larsen & Turbo (Hydrocorbon) Nardril rebar detailing Rebar detailing M.D.S Rebar Detailing Technip Indomer Woods land Detailing Cad's software pvt Itd.
- c. Research Organizations like CSIR, ISRO etc.

d. Entrepreneurs in Planning, Estimating, Design, and Civil Contractor, consultants etc. **Various designations for diploma holders in Civil Engineering are given as follows**

- 1. Junior Engineer
- 2. Technical Assistant
- 3. Supervisor
- 4. Draughtsman
- 5. Maintenance Engineer
- 6. Planner
- 7. Consultant
- 8. Estimator
- 9. Builder
- 10. Contractor
- 11. Designer
- 12. Instructor
- 13. Marketing Executive, etc..

COMPETENCY PROFILE

Keeping in view the employment opportunities of diploma holders in Civil engineering the course is aimed at developing following knowledge and skills in the students:

- 1. Basic understanding of concepts and principles of civil engineering so as to enable the students to apply the knowledge.
- 2. Development of communication and interpersonal skills for effective functioning in the world of work.
- 3. Ability to read and interpret drawings related to Civil Engg.
- 4. Knowledge of various materials used in Civil Engg., their properties and specifications.
- 5. Ability to prepare plan, section and elevation of a building, bridge drawing and structural drawing.
- 6. Ability to calculate the estimate of the Building& Bridges etc.
- 7. Ability to Design the R.C.C. Structures and Steel Structures.
- 8. Appreciation of the need of clean and green environment and its deterioration by various emissions from industry and preventive procedures and knowledge of safety regulations.
- 9. Development of generic skills of thinking and problem solving, communication attitudes and value system for effective functioning in construction side.
- 10. Understanding of the basic principles of managing men, material and machines / equipment for construction of buildings and others.
- 11. Proficiency in the use of computers.
- 12. Basic manual and machining skills for maintaining the quality of materials.
- 13. Knowledge of properties of materials used for construction.
- 14. Development of good personality in order to have effective communication and business ethic.
- 15. Holistic development with happiness and prosperity for human harmony.

CURRICULUM AREAS AS DERIVED FROM COMPETENCY PROFILE

The following curriculum areas have been derived based on competency profile.

SI.No.	Competency profile	Curriculum Areas / Subjects			
	Basic understanding of concepts and	physics			
1	principles related to applied sciences like	chemistry			
	physics, chemistry and mathematics.	mathematics			
	Development of communication and inter				
2	personal skill for effective functioning in	Communication skills			
	the world of work.				
	Understanding of basic concepts and	Mechanics of solids			
3	principles of mechanical, electrical and	General workshop practice			
	civil engineering.				
4	Ability to read and interpret drawings	Engineering drawing			
	related to civil Engg. Etc,	Building planning and drawing			
	Understand basic concepts and principles				
5	in hydrostatics, hydro- kinematics and	Hydraulics			
Ū	hydrodynamics and their application in	Tydradilos			
	solving fluid flow problems				
6	Integrating Men and materials for Quality	Project Management with MIS			
	construction and maintenance of buildings				
7	Identify Quality of various materials used	Construction materials and			
	and construction Techniques in Civil Engg.	Construction Practice			
8	Knowledge of Civil Engg. Works in	Transportation Engo.			
	Transport(Road ways, Rail ways etc.,)				
		Civil Engineering DrgI			
9	Knowledge Of Planning Of Buildings And	Cad in Civil Engg. DrgI			
	Other Structures.	Civil Engineering DrgII			
		Cad in Civil Engg. DrgII			
		Computer Applications In Civil			
10	Proficiency in the use of computers	Engineering			
		Cad in Civil Engg. Drg.l& II			
		Theory of structures(SOM&			
11	Ability to Analysis and Design the	MOS)			
	Structures(RCC & STEEL)	Structural Engineering			
		Structural Design			
	Prepare material estimates and cost	Estimation, Costing and			
12	estimates for various Civil Engineering	Valuation			
	works, basic knowledge regarding analysis				

	of rates and contracting principles of valuation	
13	Knowledge of earth's surface and calculation of areas and volumes of land.	Surveying I &II including contours
14	Appreciation of the need of clean and green environment and its deterioration by various emissions from industries and traffics in roads of preventive procedures & impurities of water.	Environmental Engg. & Pollution control.
15	Development of generic skills of thinking and problem-solving, communication, attitudes and value system for effective recruitment in placement.	Industrial visits Project work Communication Skills &Aptitude class
16	Understanding of the basic principles of managing men, material and machines / equipment for optimum production	Entrepreneurship Management & Project Management with MIS
17	Holistic development with real understanding, relationship with human being for mutual happiness and physical facility with rest of nature for mutual prosperity leads to harmony.	Universal Human Values

DETAILS OF ADDITION

DELETION OF SUBJECTS

COMPARISON BETWEEN E-SCHEME (AUTONOMOUS) AND F-SCHEME (AUTONOMOUS)

SUBJECT-	SUBJECT-	
AUTONOMOUS	AUTONOMOUS	
(E-SCHEME)	(F-SCHEME)	COMPARISION
III-TERM	III-TERM	
Theory(4):	Theory(3):	
Engineering Mechanics	Mechanics of Solids	Addition:NILDeletion:Stresses in the materials - Problems on axially loaded composite sections likeRC.C / Encased columns.PRINCIPAL STRESSES AND STRAINS:Introduction - Principal planes - Principal stresses - Principal strains -member subjected to direct stress in one plane - Two planes - mohr's circle- theory only.
Construction Materials and Construction Practice	Construction Materials and Construction Practice	Addition: 2.8 CLAY AND CEMENT CONCRETE BLOCKS: Porotherm blocks, CSE (Compressed stabilized earth blocks-IS2222/1991 AAC Blocks, Solid blocks, paver blocks, testing of blocks(IS2185/1979,PART-1) Deletion: CERAMIC PRODUCTS: Definition – Earthenware , Stoneware , Porcelain , Terracotta, Glazing, Tiles(Definitions only) – Types of Tiles – Clay Terracing tiles – Thermal care tiles – Glazed Ceramic tiles – Fully Vitrified tiles – Roof tiles special requirements for floor, wall and roof tiles– Sanitary appliances GEOSYNTHETICS: Introduction-uses in civil engineering-classification- properties of geo-textiles-uses in embankments. Physical requirements – Use of light weight aggregates -Hollow concrete (Hollow Block) masonry – Construction of walls– Advantages of hollow concretes masonry.

Surveying-I	Surveying	 Note: The course Surveying-I and II in E scheme is combined together as surveying in F scheme <u>Addition:</u> Types of Maps, Differential maps- Hand held GPS Receiver - Function Field procedure - Observation and processing applications in Civil Engineering. <u>Deletion:</u> CHAIN SURVEYING: Plane and Geodetic surveying- chaining on sloping ground - Probable obstacles met with in chain surveying. COMPASS SURVEYING: Local attraction - Detection and correction - problems. Plotting a Compass traverse - closing error and its adjustment – problems only. APPLICATIONS OF LEVELLING : Types of levelling - Check levelling : Definition, Field Procedure and use - Profile levelling or Longitudinal section(L.S) : Definition, use, field procedure and plotting the profile - Cross-sectional levelling(C.S) : Definition, use, field procedure and plotting the cross-section - Specimen field book for L.S and C.S - Reciprocal levelling : Definition, use and problems on difference in elevation - Curvature and Refraction : Effects, correction and problems - Errors in levelling - Fundamental lines and desired relationship between them - Permanent adjustments of a dumpy level : Process Use of Abney level and Planimeter. GLOBAL POSITIONING SYSTEM & AERIAL SURVEY: Need & purpose of GPS- GPS Frequency – Satellite constellation – GPS component. Aerial Survey -Introductions-definition-Aerial photograph-types- Application of aerial survey.
-------------	-----------	---

Hydraulics	Hydraulics Shifted to IV Term	
III-TERM	III-TERM	Addition:
Practical (3):	Practical (4):	BUILDING BYE-LAWS AND SUBMISSION OF DRAWINGS: Objects of bye-
Civil Engineering Drawing-I	Building Planning and Drawing	 Importance of bye-laws- Function of local authority- Setbacks- Plot Coverage- Number of floors- Height of building- Built up Area- Floor space index (FSI) - Views and details necessary for the preparation of a civil engineering drawing- Site Plan – Necessity for Approval of plans from local body- Layout plan and key plan- Requirements for submission of drawing for approval- Rules and bye- laws of sanctioning authorities for construction work.Furniture arrangement in each room- Position of stairs / lifts- Position of Doors/Windows House drainage and Sanitary fittings — Sump/Water tanks- Plumbing Pipes -Preparation of line drawing for given requirements with dimensions, not to scale. PLANNING OF INDUSTRIAL STRUCTURES Planning aspects - Requirements of industrial units - Sheets for pitched roof coverings — Rolling Shutters - Ramps- Stores- Public Toilets/ Bath rooms- Dining / Resting halls- Ventilation and Lighting - Preparation of line drawing for given requirement with measurements (not to scale). PLANNING OF PUBLIC BUILDINGS Types of public buildings - Miscellaneous public buildings - General requirements of Public Buildings - Landscape architecture-Preparation of line plan with dimensions for the given requirements (not to scale). PERSPECTIVE DRAWING (NOT FOR EXAM) Definition, Types of Perspective, terms used in perspective drawing, Perspective drawing Two Point Perspective of small objects only such as steps, monuments, pedestals

		BASIC DRAWINGS
		Fully paneled double leaf door.
		Fully Paneled single leaf door
		Fully Paneled window with grill
		Partly glazed and partly paneled window
		BUILDING DRAWINGS
		A reading room with RCC flat roof
		A Two roomed house with RCC slope roof with gable ends
		A Bank building with R.C.C flat roof.
		A Two storied Bungalow (Not for Exam)
		Deletion:
		Terms used in drawing as per NBC-Open space requirements as per NBC
		Building requirements-Minimum dimensions as per NBC-FAR and floor space
		index(FSI) for different buildings and zones-Municipal bye-laws-List of
		documents to be submitted for building plan approval Drawing instrument and
		their uses –Scales-Selection of scales-French curves-Scanners and Plotters-
		Abbreviations used in civil engineering drawing. Apartment- Framed
		Structure (Assignment purpose)
		Apartment- Framed Structure (Assignment purpose)
		NOTE: Material Testing Lab-I and Hydraulics Lab in E scheme is split up
		into Material Testing Lab-1 in III Term and Hydraulics Lab in IV Term.
		Addition:
Materials Testing	Matorial Testing	Compression Test on Wooden cube.
Lab– I And		Deflection test on wood.
Hydraulics Lab	Laboratory- I	Demonstration of Strain gauges and Strain indicators.
		Demonstration of Soundness test on cement by auto clave method.
		Tension test on deformed steel bar.
		Deletion: Nil

		Addition: GLOBAL POSITIONING SYSTEM (GPS)			
		Altitude using hand held GPS.			
		Selection and marking of routings (Way points) using hand held GPS.			
		Deletion:			
Survey practical – I	Surveying Practice –I	Ranging a chain line – taking offset.			
		Chain traversing (Field work-around a building and Plotting)			
		Obstacles to chaining but not ranging.			
		Area of a plot (One base line and at least two offsets on either side).			
	Civil Engineering	NOTE: In E schome the CAD in Civil Engineering Drawing, Lis in IV			
	Drawing and CAD	Term now it is moved to III Term without any Addition and Deletion			
	Practical – I	Term, now it is moved to in Term without any Addition and Deletion.			
IV-TERM	IV-TERM				
<u> Theory(3):</u>	<u>Theory(3):</u>				
		Addition: Nil			
Mechanics of	Theory of Structures	Deletion: Nil			
Structures	Theory of official des				
Transportation	Transportation	Addition: Advanced parking Technique in II unit			
Engineering	Engineering	Deletion: Nil			
		NOTE: The course Surveying-I and II in E scheme is combined together			
		as surveying in F scheme.			
		Addition: Nil			
Surveying-II	Surveying (III term)	Deletion:			
		Distomats(Description only)–Direct reading tachometers-Determination of			
		constants of a tachometer: Problems – Tachometric traverse – Errors in			
		tachometric surveying			
		3.1 TRIGONOMETRICAL LEVELLING:			

		Introduction–Finding elevation of objects–Base accessible- Base
		Inaccessible: Single Plane and Double Plane methods– Problems on
		Demote consistent Definition Regio Process. Methods of remote consistence
		Remote sensing – Deminition – Basic Process – Methods of Temote sensing–
		Applications-Photogrammetric Surveying– Definition–Terrestrial and Aerial
		photographs-Applications-
		4.CURVES
		Introduction – Types of curves – Designation of curves – Elements of simple
		circular curve–Setting out simple circular curve by: Offsets from long chords,
		Offsets from tangents, Offsets from chords produced and
		Rankin'smethod of deflection angles–Simple problems–Transition curves :
		Objectives–Vertical curves : Definition and types.
		Field procedure for co-ordinate measurement–Field procedure to run a
		traverse survey- Linking data files for Various Applications.
		5.2GEOGRAPHICAL INFORMATION SYSTEM(GIS)
		Introduction–Geographical information–Development of GIS– Components
		of GIS – Steps in GIS mapping - Ordinary mapping to GIS – Comparison of
		GIS with CAD and other system–Fields of Applications: Natural resources,
		Agriculture, Soil, Water resources, Waste land management and Social
		resources –Cadastral survey and Cadastral records – Land Information
		System(LIS)
	Hydraulics	Addition: Nil
		<u>Deletion:</u> Nil
Estimating costing-I	Estimating and costing	NOTE: The course Estimating and costing-I and II in E scheme is
		combined together as Estimating, costing and valuation in F scheme.
		Addition:NIL
		<u>Deletion</u> : Necessity of Estimates- Importance of fair estimation- Duties and

		requirements of a good Quantity Surveyor, Stages in Detailed Estimation.
IV-TERM	IV -TERM	Addition:
Practical (3):	Practical (4):	Determination of Chloride in the given sample water.
		Deletion:
Material Testing Lab-II	Material Testing Laboratory–II	Determination of workability of concrete by slump cone test.
		Determination of workability of concrete by compaction factor test.
		Casting of concrete cube and compression test on concrete cube.
	Hydraulics Laboratory	Addition: Flow through Orifice meter – Determination of Co-efficient of Discharge. Reciprocating pump – To draw characteristic curves and determine the efficiency Centrifugal pump – To draw characteristic curves and determine the efficiency Study of working principle of a Pelton wheel. Deletion:
	Construction Practice Laboratory	NOTE: In E scheme the Construction Practice Laboratory was in VI Term, now it is moved to IV Term. Addition: Identify various sizes of available coarse aggregates from sample of 10 kg in laboratory and prepare report (60,40, 20,10 mm) Identify the available construction materials in the laboratory on the basis of their sources. Identify the grain distribution pattern in given sample of teak wood in the laboratory and draw the various patterns. (along and perpendicular to the grains) Identify various layers and types of soil in foundation pit by visiting at least 3 construction sites in different locations of city and prepare report consisting photographs and samples.

Select first class, second class and third class bricks from the stake of bricks		
and prepare report on the basis of its properties.		
Measure dimension of 10 bricks and find average dimension and weight.		
Perform field tests - dropping, striking and scratching by nail and correlate the results obtained.		
Apply the relevant termite chemical on given damaged sample of timber.		
Apply two or more coats of selected paint on the prepared base of a given		
wall surface for the area of 1m x 1m using suitable brush/ rollers adopting safe practices.		
Prepare mortar using cement and Sand/ Fly ash or Granite/marble polishing		
waste in the proportion 1:6 or 1:3.		
Deletion:		
Demonstration and practice of painting, varnishing and polishing		
Casting and testing of small R.C beams		
Calculation of areas centering of the following (Given sketch)		
a) Roof slab with Beam		
b) Column.		
Measurement Book – Procedure for entering in measurement book		
Entering measurement for building works All the students should enter		
directly on measurement book and they should keep the Entry for the		
following works independently in the measurement book including Schedule		
rates for the respective work for the current year. Setting out a small building		
in the field for a given line plan.		
EXERCISE FROM EXISTING BUILDINGS INSIDE THE CAMPUS AND		
ONLY SINGLE ROOM FOR EACH STUDENT		
Measurement and abstract for flooring work		
Measurement and abstract for Brick work		
Measurement and abstract for color washing		

		III. PRE – MEASUREMENT FOR STEEL WORK						
		The following models should be prepared in the laboratory, students should						
		take out measurement from the model, they should enter the measurement in						
		the measurement book and the total quantity of steel required in kg for each						
		item may be arrived. Distributor - 6 mm dia – 12 nos.						
		1 One way slab-size - 2.0 m x 3.50 m.						
		Main rod - 8 mm dia – 20 nos.						
		2. Column footing						
		Footing – size – 1.0 m x 1.0 m – 10 mm dia 5 nos. each direction						
		Column size 230 x 230 mm– 4 nos. 12mm dia.						
		3. Beam – size – 230 mm x 300 mm – Length – 2.0 m.						
		Bottom rod – 12 mm – 3 nos.						
		Top rod – 10 mm – 2 nos.						
		Stirrups – 6 mm – 14 nos.						
		III .CONCRETE MIX DESIGN (For demonstration purpose only, but it is						
		compulsory) – I.S Method only.						
SURVEY	SURVEY PRACTICAL -	Addition: Nil						
PRACTICAL – II	II	Deletion: Nil						
IV-TERM	IV-TERM							
<u> Theory(3):</u>	<u> Theory(3):</u>	ADDITION:						
Structural Engineering	Structural Engineering	Behavior of R.C members in bending, – Different types of loads on structures as per IS: 875-1987 - Different methods of design. Actual and Critical neutral axes – Under / Over reinforced sections- Balanced sections – Lever arm, Advantages-Design stress in tension and compression steel. face reinforcement as per IS 456 -2000 - Development Length Anchorage values of bends and hooks - Curtailment of Reinforcements.						

		2.2 DESIGN OF CONTINUOUS BEAMS FOR FLEXURE					
		BY L.S.M Methods of analysis of continuous beams- Effective Span-					
		Arrangement of Loading for Critical Bending Moments- B.M coefficients					
		specified by IS:456-200-Design of rectangular continuous beams (Singly and					
		Doubly Reinforced) using B.M. coefficients (equal spans &u.d.l only) for					
		sagging and hogging moments

Project Engineering Management With MIS	Construction Management	Addition:BOOT Contract type.FEASIBILITY STUDYStudy of necessity of project– Technical feasibility, Financial feasibility,Ecological feasibility, Resource feasibility, Recovery from the project,Economical Analysis –Building Economics – Preliminary studies, Analysis –valuation. Objectives of planning – Public Project - Preliminary planning –Design factors – Site utilization- – Reconnaissance survey – Preliminarysurvey – Analysis and plotting of data – Estimate : preliminaryand detailed estimate –Project report – Land acquisition – Administrativeapproval –Technical sanction – Budget provision- Private project.ETHICS IN ENGINEERINGHuman values - Definition of Ethics - Engineering ethics – Engineering as aprofession - Qualities of professional - Professional institutions -Code ofethics - Major ethical issues - Ethical judgment – Engineering andmanagement decision - Value based ethics.ENTREPRENEURSHIP:Definition – Role and Significance – Risks and				

		Rewards – Concepts of Entrepreneurship – Profile and requirement of
		entrepreneur - Programmes existing in India – SISI, DIC, TANSIDCO –
		Funding and technical assistance to Entrepreneurship-
		NIDCO ICICI IDBLIECI SEC
		FINANCIAL MANAGEMENT
		Elements of cash flow – Time value of money – Interest rate of capital –
		Present value computation - NPV method – IRR method – simple problems -
		Global banking culture - Types of banks –Activities of Banks – Corporate
		finance – Personal, retail and rural banking – Treasury management-Cost
		Analysis-Direct Cost –Indirect Cost-total cost.
		Deletion:
		HUMAN FACTORS IN CONSTRUCTION:
		Traits of efficient construction managers - Team building/Contract
		implementation /project organization skills - Ethics and integrity
		CONSTRUCTION ECONOMICS
		Types of taxes - Introduction to – Excise Tax Service Tax , Income Tax, VAT,
		Custom Duty. Income expenditure statement (basic concept only)- balance
		sheet.
		NOTE: This subject is a combination of Estimating And Costing-I &
		Estimating And Costing-II of E scheme
		Addition: Nil
		DELETION:
Estimating And	Estimation, Costing	DELETION:
Costing-II	and Valuation	TAKING OFF QUANTITIES OF P.H.ENGINEERING STRUCTURES USING
-		TRADE SYSTEM
		1.Open well with masonry steining
		2. Square RCC over head tank on four columns with staging.

		TAKING OFF QUANTITIES OF ROAD/BRIDGE STRUCTURES USING
		TRADE SYSTEM
		1.Cement concrete road with side drains
		2.T beam bridge
		3.Pipe culvert
<u>Elective(3):</u> Repair &Rehabilitation Structure	<u>Elective(3):</u> Sustainable and Green Building Technology	<u>NOTE</u> . This theory course Was added a one of the Elective theory in F-Scheme.
Steel Structures	Urban Planning and Development	<u>NOTE</u> . This theory course Was added a one of the Elective theory in F-Scheme.
Earth Quake Engineering	Water Resources Engineering	NOTE: This theory course Was added a one of the Elective theory in F-Scheme in E scheme Water Resources Engineering one of the Elective in V term.
IV-TERM	IV-TERM	
Practical (3):	Practical (3):	
Structural Design & Drawing.		Note :Structural Design & Drawing subject was removed from F-Scheme Syllabus. but the following Structural Design & Drawing topics were added in Civil Engineering Drawing and CAD Practical – II Continuous one-way slab (with three equal spans) Simply supported two-way slab Restrained two-way slab Singly reinforced rectangular beam Doubly reinforced Continuous beam (Rectangular beam with two spans) Tee Beams supporting continuous slab Lintel and Sunshade Dog-legged staircase

		Develop the drawing using CAD Packages and prepare detailed estimate for the Following works:1) School building. 02) A residential building with two bed rooms with RCC flat roof.03) Septic tank with Dispersion Trench 04)) R.C.C slab culvert Study of INTERNET - Using World Wide Web – Browsing famous Civil Engg. Sites. Creating an E-mail ID, sending E-mails with attachments.
Construction Practice Lab		NOTE: This practical course Was added in IV term.
<u>Elective(3):</u> 	<u>Elective(3):</u> Estimation and Costing Laboratory	<u>NOTE</u> : This Practical course Was added a one of the Elective theory in F-Scheme.
	Highway Engineering Laboratory	<u>NOTE:</u> This Practical course Was added a one of the Elective theory in F-Scheme.
	Water Resources Engineering Laboratory	<u>NOTE</u> : This Practical course Was added a one of the Elective theory in F-Scheme.
Project Work With Entrepreneurship & Disaster Management	Project Work and Internship	Addition: • COMPARATIVE STUDY • ADMIXTURES • STUDY OF SPECIAL TYPES OF CONCRETE IN CONSTRUCTION BYEXPERIMENTS

8. HORIZONTAL AND VERTICAL ORGANISATION OF THE SUBJECTS

III TERM

SESHASAYEE INSTITUTE OF TECHNOLOGY (Autonomous), TRICHY-10 1: DIPLOMA IN CIVIL ENGINEERING SYLLABUS F-SCHEME

(To be implemented for the students admitted from the year 2020-21 onwards)

Programme Name	:	DIPLOMA IN CIVIL ENGINEERING
Course Code	:	1F 3201
Term	:	111
Course Name	:	MECHANICS OF SOLIDS

TEACHING AND SCHEME OF EXAMINATION

No of weeks per semester: 16 weeks

	Instr	ructions	Examination				
Subject	Hours			Marks			
oubjeet	/ Week	Semester	Internal Assess ment	Internal Board Assess Examinations		Duration	
MECHANICS OF SOLIDS	6	96	25	100*	100	3 Hrs.	

Examinations will be conducted for 100 marks and it will be reduced to 75 marks.

Topics and Allocation of Hours

UNIT	Торіс	Hrs.
I	Simple Stresses and Strains	22
II	Shear Force and Bending Moment	17
	Geometrical Properties of Sections	17
IV	Stresses in Beams and Shafts	17
V	Pin Jointed Frames	16
	Test & Model Exam	7
	Total	96

RATIONALE:

During design of any structural member, the analysis of structure is very important. The application of loads and its effect on the member is also equally important. The knowledge of physical property and its structural behavior is very essential. So these things are included in Strength of materials. **OBJECTIVES:**

At the end of this course, students will be able to

• Define Mechanical Properties of materials and different type of stress and strain.

- Understand the applications of stress and strain in engineering field.
- Analyze determinate beams and sketch S.F. and B.M. diagram.
- Locate the position of centroid of different geometrical section and Built up section and determine Ixx, Iyy, Zxx, Zyy of different geometrical section & built up sections.
- Derive simple bending eqn. and understand its applications.
- Derive Torsional equation and understand its applications.
- Analyze Pin Jointed Frames analytically and graphically.
- Solve simple problems in the course of study.

Course Outcome:

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details	BTL
	Ability to examine the structural members subjected to	
153201 001	tension, compression, torsion, bending and combined	A 3
11 3201-001	stress using the fundamental concepts of stress, strain	A-J
	and elastic behavior of materials	
153201 002	Ability to analyze the structural beams for shear force	۸ <i>۸</i>
11 3201-002	and bending moment.	A-4
1E3201 CO3	Ability to devise the geometrical properties of sections	C 6
11 3201-003	and moment of inertia.	0-0
1F3201-CO4	Ability to deduce the stresses in beams and shafts.	A-4
153201 005	Ability to analyze the pin jointed frames graphically and	A 4
11 3201-605	statically.	A-4

Legends: R = Remember U= Understand; A= Apply and above levels (BTL-Bloom's revised taxonomy Level)

DETAILED SYLLABUS

Contents: Theory							
Unit	Name of the Topics	Hrs					
	SIMPLE STRESSES AND STRAINS						
	CHAPTER:1.1 INTRODUCTION TO STRESSES AND STRAINS	11					
	Definitions of: Force, Moment of force, Actions and reactions,						
	Statics, Static equilibrium of bodies, Mechanics, Engineering						
	Mechanics - Conditions of static equilibrium - Types of forces on						
	structural members- Study of strength of material - Mechanical						
	properties of materials – Rigidity, Elasticity, Plasticity,						
	Compressibility, Hardness, Toughness, Stiffness, Brittleness,						
	Ductility, Malleability, Creep, Fatigue, Tenacity, Durability -						
	Definitions of stress and strain - Types of stresses - Tensile,						
	Compressive and Shear stresses - Types of strains - Tensile,						
	Compressive and Snear strains - Elongation and Contraction -						
	Longitudinal and Lateral strains - Poisson's Ratio - Volumetric						
	Poisson"s ratio shange in dimensions and volume etc. Hocks"s						
	Law Elastic Constants Definitions of Young's Modulus of						
I	Elasticity – Shear modulus (or) Modulus of Rigidity – Bulk	11					
	Modulus - Relationship between elastic constants (Derivations						
	not necessary)- Simple problems						
	CHAPTER:1.2 APPLICATION OF STRESS ANDSTRAIN						
	IN ENGINEERING FIELD						
	Behaviour of ductile and brittle materials under direct loads - Load						
	Extension curve (or) Stress Strain curve of a ductile material -						
	Limit of proportionality, Elastic limit, Yield stress, Ultimate stress,						
	Breaking stress, Actual / Nominal stresses - Working stress						
	Factor of safety - Percentage elongation - Percentage reduction						
	in area - Significance of percentage elongation and reduction in						
	area of cross section - Deformation of prismatic and stepped bars						
	due to uniaxial load - Deformation of prismatic bars due to its self						
	weight - Numerical problems. Composite Sections – Examples of						
	composite sections in Engineering field- Advantages -						
	Assumptions made – Principles of analysis of Composite sections						
	- Modular ratio - Equivalent area (No problems).						
	SHEAR FORCE AND BENDING MOMENT						
	CHAPTER:2.1 TYPES OF LOADS AND BEAMS	8					
	Definitions of: Axial load, Transverse load, Concentrated (or)						
	Point load, Uniformly Distributed load (UDL), Varying load –						
	Types of Supports and Reactions: Simple support, Roller support,						
	Hinged support, Fixed support; Vertical reaction, Horizontal						

reaction. Moment reaction- Types of Beams based on support	
conditions- Diagrammatic representation of beams loads and	
supports - Static equilibrium equations - Determinate and	
indeterminate beams	
BEAMS	9
Definitions of Shear Force and Bending Moment – Conventional	
signs used for S.E. and $B.M - S.E.$ and $B.M$ of general cases of	
determinate beams – S.F. and B.M. diagrams for Cantilevers	
Simply supported beams_ Position of maximum BM - Derivation	
of Pelation between intensity of load SE and B.M. Numerical	
problems on S E and P M. (Determinate beams with concentrated	
problems on S.F and D.M. (Determinate beams with concentrated	
GEOMETRICAL PROPERTIES OF SECTIONS	
Chapter: S.I CENTROID	
Geometrical properties – Demitions and examples of	
Symmetrical, And Symmetrical, Asymmetrical shapes - Deminions	
of centre of gravity and centroid - Centroid of Symmetrical	0
snapes (solid / nollow square, rectangular, circular, i	8
Sections) - Centroid of Asymmetrical shapes (triangular, semi	
circular, quadrant, trapezoidal, parabolic sections) - Centroid of	
Anti Symmetric shapes (S, Z sections)– Built up structural	
sections – Problems	
CHAPTER:3.2 MOMENT OF INERTIA	
Definitions of: Inertia, Moment of Inertia, Polar moment of inertia,	
Radius of gyration, Section Modulus, Polar modulus - Parallel	
and perpendicular axes theorems - Derivation of expressions for	
M.I / Polar M I, Section modulus and Radius of gyration of	9
regular geometrical plane sections (rectangle and circle only) –	
M.I about centroidal axis / base, Section modulus, Radius of	
gyration of symmetric, asymmetric, anti symmetric and built up	
symmetrical sections – Numerical problems.	
STRESSES IN BEAMS AND SHAFTS	
CHAPTER:4.1 STRESSES IN BEAMS DUE TO BENDING	
Types of Bending stresses – Neutral axis – Theory of simple	
bending- Assumptions - Moment of resistance - Derivation of	
flexure/bending equation M / I = E / R = σ/y – Bending stress	8
distribution – Curvature of beam – Position of N.A and centroidal	
axis – Stiffness equation – Flexural rigidity – Strength equation –	
Significance of Section modulus – Numerical problems.	
CHAPTER:4.2 STRESS IN SHAFTS DUE TO TORSION	
Definitions of: Shaft, Couple, Torque (or) Twisting moment -	

	Types of Shafts (one end fixed and the other rotating, both ends						
	rotating at different speeds) - Theory of Pure Torsion –						
	Assumptions -Derivation of Torsion equation, T / Ip = λ max/ R =						
	GO / I - Shear stress distribution in circular section due to torsion						
	- Strength and Stiffness of shafts – Torsional rigidity - Torsional						
	modulus - Power transmitted by ashaft - Numerical problems.						
	PIN JOINTED FRAMES						
	CHAPTER:5.1 ANALYSIS BY ANALYTICAL METHOD	10					
	(METHOD OF JOINTS)						
	Definitions of: Frame / Truss, Pin Joint, Nodes, Rafters, Ties,						
	Struts, Slings-Determinate and indeterminate frames-						
	Classification of frames – Perfect and imperfect frames–						
	Deficient / Instable and redundant frames - Formulation of a						
	perfect frame - Common types of trusses - Support conditions -						
	Resolution of a force - Designation of a force - Nature of forces in						
	the frame members - Analysis of Symmetrical Frames –						
V	Assumptions - Methods of analysis - Analytical methods - Method						
v	of Joints and Method of Sections - Problems on Analysis						
	ofcantilever and simply supported perfect frames (with not more						
	than ten members) with vertical nodal loads by method of joints						
	only. Identification of members with nil force in a determinate	6					
	truss.						
	5.2 ANALYSIS BY GRAPHICAL METHOD						
	Graphic statics - Advantages - Space diagram - Bow's notation-						
	Resultant force (or) Equivalent force -Equilibrant force - Vector						
	diagram - Determination of magnitude and nature of forces in the						
	members of a cantilever / simply supported determinate trusses						
	(withnot more than eight members) with vertical nodal loads only.

RATIONALE:

Civil Engineering diploma holders have to supervise construction of various types of civil works involving, the use of various materials like stones, bricks and tiles, cement and cement based products, lime, timber and wood based products, paints and varnishes, metals and other miscellaneous materials. The students should have requisite knowledge regarding the characteristics, uses and availability of various building materials and skills in conducting tests to determine the suitability of materials for various construction purposes. In addition, specifications of various materials should also be known (PWD/BIS) for effective quality control. To perform the above tasks, it is essential that students should have knowledge of various sub components of buildings like foundations, walls, roofs, stair cases, floors etc., and their constructional details. Therefore, the subject of Construction Materials and Construction Practice is very important for Civil Engineering diploma holders.

OBJECTIVES:

On completion of the course, the students will be able to:

- State different construction materials and their properties.
- Explain the different types of cement, grades of cements and tests on cement.
- State and explain the different types of modern building materials such as ceramicproducts, glass, metals and plastics.
- Explain the method of preparation of mortar, cement concrete and state the differenttypes of structures.
- Describe the different types of foundations.
- Describe the classification of stone masonry & brick masonry. State the differenttypes of doors, windows, lintels & stairs.
- Describe the types of floors and roofs.
- Describe the different methods of pointing, plastering and termite proofing.
- Explain the methods of scaffolding, shoring & underpinning and form work Describe procedure of colour washing, white washing, painting and varnishing.

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details					
153202_001	Ability to summarize the properties and uses of stones,	Λ 5				
11 3202 -001	rocks, bricks, lime, cement, water, glass and ceramics.	A-J				
	Ability to classify the types, properties and uses of					
1F3202 –CO2	mortar, concrete, paints, metals, plastics, timber, roof	U-2				
	coverings ,damp proofing materials and geo synthetics.					
1F3202-CO3	Ability to describe different types, methods of	A-2				

	construction and uses of foundations, brick and stone		
	masonry, partitions, Water proofing and damp proofing.		
	Ability to Explain different types, methods of construction		
153202 004	and uses of doors, windows, ventilator, Hollow block	11.2	
15202 -604	construction, stairs, floors, flooring, roof and weathering	0-2	
	course.		
	Ability to discuss the methods of pointing, plastering,		
1F3202-CO5	scaffolding, shoring and underpinning, painting, colour	A-6	
	washing, Anti termite treatment and form work.		

Legends: R = Remember U= Understand; A= Apply and above levels (BTL-Bloom's revised taxonomy Level)

DETAILED SYLLABUS

Contents: Theory

Name of the Topics	Hours
CHAPTER : 1.1 INTRODUCTION	
Physical properties of materials - Density, Bulk density, Specific gravity, porosity, water absorption, permeability, chemical resistance, fire resistance, weathering resistance, thermal Conductivity, Durability. (Definitions only).	2
CHAPTER : 1.2 ROCKS AND STONES	2
Rocks - Classification of Rocks - Geological, Physical and Chemical classification - Uses of stones - Requirements of a good building stone - Natural and Artificial stones for flooring - Examples (Detailed description not required).	
	2
CHAPTER : 1.3 BRICKS	
Definition - Brick earth - Composition of good brick earth - Manufacturing process- classification of bricks - properties of bricks - special types of bricks and their uses - compressive strength of bricks. Tests on bricks (Names only)	
grades and Corresponding requirements of bricks as per BIS.	2
CHAPTER : 1.4 LIME AND POZZOLANAS	
Sources of lime - classification lime - Fat, Hydraulic and Poor	
Ime - uses of Ime - Pozzolanic materials - Surki, Flyash,	•
Ground plast turnace slag, Rice nusk ash - Advantages of	3
CHAPTER : 1.5 CEMENT	
	Name of the Topics CHAPTER : 1.1 INTRODUCTION Physical properties of materials - Density, Bulk density, Specific gravity, porosity, water absorption, permeability, chemical resistance, fire resistance, weathering resistance, thermal Conductivity, Durability. (Definitions only). CHAPTER : 1.2 ROCKS AND STONES Rocks - Classification of Rocks - Geological, Physical and Chemical classification - Uses of stones - Requirements of a good building stone - Natural and Artificial stones for flooring - Examples (Detailed description not required). CHAPTER : 1.3 BRICKS Definition - Brick earth - Composition of good brick earth - Manufacturing process- classification of bricks - properties of bricks - special types of bricks and their uses - compressive strength of bricks - Tests on bricks(Names only) - grades and Corresponding requirements of bricks as per BIS. CHAPTER : 1.4 LIME AND POZZOLANAS Sources of lime - classification lime - Fat, Hydraulic and Poor lime - uses of lime - Pozzolanic materials - Surki, Flyash, Ground blast furnace slag, Rice husk ash - Advantages of adding pozzolanas to cement. CHAPTER : 1.5 CEMENT

	Definition - Composition of ordinary Portland cement - Functions of Cement ingredients - Different types of cements -	
	Grades of cement (33,43 and 53) - Storage of cement - Tests on cement (Names only) - objects of each test - Test requirements/ BIS specifications of OPC– Admixtures - Definition, types and uses.	2
	CHAPTER : 1.6 WATER General requirement of water used in construction works - Use of sea water in construction works- Permissible limits of deleterious materials in construction water as per BIS- Effects of Sulphates and Chlorides in ground water - Minimum pH value	2
	CHAPTER : 1.7 GLASS Definition - Constituents of glass- Classification of glass - Functions and Utility - Types of glass, sizes and thickness used in Buildings.	
	CHAPTER : 2.1 MORTAR Definition - Properties and uses of mortar- M Sand for mortar- Types of mortar - Cement and Lime mortar - Mix ratio of cement mortars for different Works.	1
	CHAPTER : 2.2 CONCRETE Definition - Constituents of concrete and their requirements - uses of concrete - Types of concrete: Lime concrete, cement concrete and light weight concrete, Self compacting concrete and ready mix concrete – Definitions only.	1 2
I	CHAPTER :2.3 PAINTS AND VARNISHES Definition - Functions of paint Types of paints and their uses - Oil, Enamel, Emulsion, Distemper, Cement, Aluminium, Bituminous and Plastic paints -Varnishes, Definition- Characteristics of a good varnish –Types of varnish and their uses Oil, Turpentine, Spirit and water varnish.	3
	CHAPTER : 2.4 METALS AND PLASTICS Types of metals used in construction - Cast Iron, Steel, Aluminum, GI, Stainless steel- Market forms of steel - Steel for reinforced concrete - steel for pre stressed concrete - Plastics Characteristics and Uses of plastics -Types -	

	Thermoplastics and Thermosetting plastics - Various plastic products: pipes, taps, tubs, basins, doors, windows, water tanks, partitions sizes, capacity and uses-Advantages and disadvantages of plastic products- Asbestos – uses of asbestos.	2
	CHAPTER : 2.5 TIMBER AND TIMBER PRODUCTS Types of Timber -Teak, Sal, Rosewood, Mango, and Jack – Defects in timber- seasoning of timber- objectives - Timber Products - Veneers, Ply woods, Particle Board, Fiber board, Hard board, Blackboard, Laminated board Uses.	2 2
	CHAPTER : 2.6 ROOF COVERINGS Definition - objectives and uses - AC Sheets FRB Sheets - G.I. sheets- Steel sheets- Polycarbonate sheets- Shell roof – R.C.C roof Advantages - Types.	2
	CHAPTER : 2.7 DAMP PROOFING MATERIALS: Materials used for damp proofing – Properties and functions of various types of water proofing materials commonly available – chemicals used for grouting / Coating porous concrete surfaces – Admixtures for cement mortar and cement concrete – Functions of Admixtures – Accelerators, Retarders, Air repelling chemicals.	
	CHAPTER : 2.8 CLAY AND CEMENT CONCRETE BLOCKS Porotherm blocks, CSE (Compressed stabilized earth blocks- IS2222/1991 AAC Blocks, Solid blocks, paver blocks, testing of blocks(IS2185/1979,PART-1)	
	CHAPTER : 3.1 INTRODUCTION TO STRUCTURES Permanent and temporary structures - Life of structures - Sub structure -super structure - load bearing structure - framed structure - concept of framed structure - advantages of framed structure.	2
III	CHAPTER : 3.2 FOUNDATION Definition - objectives of foundation - Bearing capacity of soil – Definition -maximum/ultimate and safe bearing capacity - Bearing capacity of different types of soils - Requirements of a good foundation - Types of foundations - Shallow foundation: Spread foundation, Isolated column footing, combined footing,	3

	continuous footing, Raft foundation – Deep Foundation: Pile,	
	Stone columns Types of piles : Bearing pile, Friction pile, under	
	reamed pile - Causes of failure of foundation - Remedial	
	measures.	
	CHAPTER : 3.3 STONE MASONRY	2
	Definition - Common terms used · Natural bed sill corbel	
	course cornice coning weathering throat shalls quoins	
	string course lacing course through stone plinth jambs	
	Classification of stanomasonny Bubble masonny	
	Classification of stonemasonry - Rubble masonry .	
	Coursed, un coursed & Random rubble masonry - Asniar	
	masonry - points to be considered in the Construction of stone	
	masonry - Tools used (Names only).	
		3
	CHAPTER : 3.4 BRICK MASONRY	
	Definition - Common terms used - Header, stretcher, bed joint,	
	lap, perpend, closer, king, queen & beveled, bat permissible	
	loads in brick masonry - Bond - Types Header, stretcher,	
	English bond & Flemish bond one brick thick and one and a	2
	half brick thick - T" junction in English bond - Points to be	
	considered in the construction of brick masonry - Cavity bond	
	masonry - Defects in brick masonry -Maintenance of brick	
	masonry - Delects in blick masonry -Maintenance of blick	2
	masonry - Reinforced blick masonry - purpose - its Advantage	3
	with respect to strength and Earthquake resistance.	
	Definition - Requirements of good partition wall - Types Brick,	
	Concrete, glass, Aluminum frame with Glass sheet, timber,	
	straw board, wood wool, Asbestos Cement board and plastic	
	board partitions	
	CHAPTER :3.6 WATER PROOFING AND DAMP PROOFING	
	Dampness - Causes of dampness - Effects of dampness -	
	Damp proofing - Damp proof courses (DPC) - Method of mixing	
	- Bad effects of excessive Admixtures in RCC - Water proofing	
	coats for sump / overhead tank wall - Methods of grouting.	
	CHAPTER : 4.1 DOORS, WINDOWS AND VENTILATORS	
	Standard sizes of doors and windows - Location of doors	3
IV	and windows - Different materials used - Doors Component	
	parts-Types - Framed and panelled, glazed, flush, louvered,	
	and collapsible, rolling shutter and sliding doors - Windows	

Types - Casement, Glazed, Bay, Corner, Pivoted, Circular and Dormer windows- Ventilators – Definition, purpose, Types - Ventilator combined with windows / doors.	
CHAPTER : 4.2 HOLLOW BLOCK CONSTRUCTIONS Hollow blocks - Advantages of hollow blocks - load bearing and non load bearing hollow blocks - Open cavity blocks – face shells, web, gross area, nominal dimensions of blocks, minimum thickness of face shells and web, grades of hollow concrete blocks - Materials used, admixtures added - mixing, moulding, placing and compacting, curing, drying.	2
CHAPTER : 4.3 STAIRS Definition - Terms used - Location of stair types - Straight, Dog legged, Open well, bifurcated and spiral stairs - Moving stairs (Escalators) - Lift components uses and advantage of lifts over stairs.	2
CHAPTER : 4.4 FLOORS AND FLOORING Floors - Definition - Types - Timber, Composite, RCC floors -Flooring - Definition- Materials used - Selection of flooring types -Construction Methods (As per C.P.W.D/P.W.D Specifications) - Mosaic, Granolithic, Tiled, Granite, Marble, Pre cast concrete flooring, Plastic & PVC tile flooring- Carpet tile & Rubber flooring.	3
CHAPTER : 4.5 ROOFS Definition - Types of roof - Flat roof - RCC roof - Pitched roof- Tile roof - Shell roof - Technical terms - Steel roof truss Types: King post, Raised chord, Howe truss, Fan, fink, north light and Modified north light trusses.	2
CHAPTER : 4.6 WEATHERING COURSE Weathering course – Purpose - Materials Required - Brick Jelly Concrete preparation - Laying procedure- Preparation of mortar with Damp Proof materials for laying pressed clay tiles-	
Pointing and Finishing of clay tiles - Use of Thermal Resistant - Weathering Tiles.	2

	CHAPTER : 5.1 POINTING	
	Objectives - Mortar for pointing - Methods of pointing (As per C.P.W.D. / P.W.D Specifications) - Types of pointing -	2
	Flush, recessed, weathered, keyed or grooved pointing. CHAPTER : 5.2 PLASTERING: Definitions - Objectives -	
	Cement mortars for Plastering - Requirements of a good plaster - Methods of Plastering - Defects in plastering - Stucco plastering - Acoustic plastering - Granites silicon – plastering – Sand faced Pebble dash - Wall paper finishing- Wall tiling.	3
V	CHAPTER: 5.3 WHITE WASHING, COLOUR WASHING , DISTEMPERING, PAINTING & VARNISHING: White washing - preparation of surface - Application of white wash- Colour washing - Distempering - Preparation of surfaces - Application of distemper- Painting & Varnishing - Preparation of Surface - Application of Painting & Varnishing.	3
	CHAPTER: 5.4 ANTI-TERMITE TREATMENT :Definition - objectives and uses - Methods of termite treatment.	
	CHAPTER : 5.5 SCAFFOLDING, SHORING AND UNDER PINNING: Scaffolding – Definition - Component parts - Types	1
	Single, double& Steel scaffolding, Shoring – Definition - Types Raking, flying and dead shores - Underpinning definition - Purpose - Types - Pit Methods - Pile Method.	3
	CHAPTER: 5.6 FORM WORK: Definition - Materials used - Requirements of a good form work - Form work for column, RC beams and RC slab.	2
	Test & Model Exam	7hrs

I	Introduction to Surveying and Chain Surveying and compass			
	Surveying			
II	Levelling	17		
	Theodolite Surveying, hydrographic surveying & sounding	17		
IV	Tacheometric Surveying & Contour Surveying	17		
V	Total Station and Global Positioning system	16		
Test & Model Exam				
	Total	96		

RATIONALE:

The important functions of a diploma civil engineer include the jobs of detailed surveying, plotting of survey data, preparation of survey maps and setting out works. While framing the curriculum for the subject of surveying, stress has been given to the development of the skill in each type of survey like chain surveying, compass surveying and levelling that the Civil Engineering diploma holder will normally be called upon to perform. Each type of Survey like Chain surveying, Compass surveying, Levelling, Theodolite surveying, Tachometric surveying, Contour surveying, Total station surveying and GPS introduced in this course.

OBJECTIVES:

On completion of the course, the students will posses knowledge about:

- Chain surveying
- Compass surveying
- Theodolite surveying
- Tacheometric Surveying
- Preparation of Contour layouts
- Total Station Surveying
- Global Positioning System

Course Outcome:

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

СО	Details	BTL	
1E3203_CO1	Ability to assess the errors chain surveying and compass	55	
11 5205-001	surveying.	L-5	
1E3203-CO2	Ability to determine the Reduce level of the ground by leveling	∆_3	
11 5205-002	instruments.	Α-3	
1F3203-CO3	Ability to deduce angles by theodolite surveying.	E-5	
153203 CO4	Ability to analyze distance, elevation and errors in tachometric	A 4	
11 5205-004	surveying and contour surveying.	A-4	
1E3203_CO5	Ability to summarize the components, features, Field	11_2	
11 5205-005	procedure of total station and GPS.	0-2	

 Legends: R = Remember U= Understand; A= Apply and above levels (BTL-Bloom's revised taxonomy Level)

DETAILED SYLLABUS

Contents: Theory				
Unit	Name of the Topics	Hours		
	INTRODUCTION TO SURVEYING AND CHAIN SURVEYING AND CAMPASS SURVEYING CHAPTER :1.1 SURVEYING Definition-Objectives and uses of surveying -Classification of Surveying - Principles of surveying. CHAPTER :1.2 CHAIN SURVEYING Introduction-Instruments used for chaining- Chains and Tapes— Types - Definitions of terms commonly used chain	2		
I	surveying: Survey stations, base line, check line and tie line - Ranging: Direct and Indirect ranging Offsets: Definition, types, Instruments used-Errors in Chaining, Tape corrections and its necessity.	10		
	CHAPTER :1.3 COMPASS SURVEYING Angular measurements-Necessity Instruments used Prismatic compass-Construction details, functions and Temporary adjustment - Types of meridians - Types of bearings - Whole circle and Reduced bearings ,Fore and Back bearings - Computation of included angles from bearings -Computation of bearings from included angles - Problems.	10		
	CHAPTER :2.1 LEVELLING			
II	Levelling - Definition - Level Parts, Functions, Accessories- Types of levels : Dumpy level, Quick setting level, Automatic and Laser level Levelling staff - Types Component parts of Levelling instrument - Definitions of terms used : Level surface, Horizontal and Vertical surfaces, Datum, Bench marks, Reduced level, Rise, Fall, Line of collimation, Axis of telescope, Axis of bubble tube, Station, Back sight, Fore sight, Intermediate sight, Change point, Height of instrument, Focusing and Parallax - Temporary adjustment of a level - Balancing - Back sight and Foresight- Principle of levelling - Simple levelling -Levelling field book - Reduction of levels - Height of collimation and Rise and Fall method - Comparison of methods - Problems on reduction of levels - Missing entry calculations : Problems.	17		
	CHAPTER :3.1 THEODOLITE SURVEYING	12		
111	Introduction - Types of Theodolites: Transit and non- transit Theodolite, Vernier and Micrometer Theodolites, Electronic Theodolite (Principles and description only) - Component parts of a transit Theodolite - Functions - Technical terms used in Theodolite surveying - Temporary adjustments- Measurement of horizontal angle by method			

	of repetition and reiteration- Measurement of vertical angle and deflection angle - Reading bearing of a line- Theodolite traversing - Methods - Field checks in closed traverse - Latitude and departure - Consecutive coordinates - independent coordinates - Problems on computation of area of closed traverse - Omitted measurements - Problems CHAPTER :3.2 HYDROGRAPHIC SURVEYING , SOUNDING Hydrographic surveying – Definition- Uses – Sounding: Definition, Purpose, Instruments needed–Steps in hydrographic surveying	5
IV	Chapter: 4.1: TACHEOMETRIC SURVEYING Introduction-Instruments used in tacheometry - Systems of tacheometry: Stadia and Tangential tacheometry - Principles - Fixed hair method of tacheometry - Distance and Elevation formulae - Anallactic lens (No proof) - Advantages and uses - Simple problems.Determination of constants of a tacheometer - Problems. Chapter: 4.2: CONTOUR SURVEYING Definition - Contour - Contouring - Characteristics of contours - Methods of contouring - Direct and Indirect methods -	9 8
	Interpolation of contours - Different methods – Contour gradient - Uses of contour plan and map.	
V	TOTAL STATION AND GLOBAL POSITIONING SYSTEM Chapter: 5.1: TOTAL STATION Introduction - Application of total station - Component parts of a Total Station - Accessories used - Summary of total station characteristics - Features of total station - Electronic display and data reading – Field procedure for co-ordinate measurement- Instrument preparation, Setting and Measurement (Distance, Angle, Bearing etc.).	8
	 Chapter: 5.2: GLOBAL POSITIONING SYSTEM (GPS) Introduction - Maps- Types of Maps - Various Satellites used by GPS - Differential GPS - Fundamentals of GPS - Application of GPS - GPS Receivers - Hand held GPS Receiver - Function Field procedure - Observation and processing applications in Civil Engineering. Test & Model Exam 	7hrs

BUILDING PLANNING AND DRAWING	4	64	25	100*	100	3 Hrs.

* Examinations will be conducted for 100 marks and it will be reduced to 75 marks.

Topics and Allocation of Hours

UNIT	Торіс	Hrs.
I	Introduction	5
П	Planning of Building	5
	Basic Drawings	9
IV	Building Drawings	38
	Test & Model Exam	7
	Total	64

RATIONALE:

Drawing is the language of engineers. Engineering is absolutely incomplete without athorough knowledge of drawing. A Civil Engineering diploma holder must be capable of sketching detailed constructional drawing of various components of building for the purpose of communication with the craftsman. Planning of small buildings, developing a line plan, dimensioning, key plan, and drainage plan should be a part of curriculum. The diploma engineer must be conversant with reading and interpretation of drawing for execution of work.

OBJECTIVES:

On completion of the course, the students will be able to:

- Study Conventions and Abbreviations;
- Prepare layout of buildings;
- Gain thorough knowledge of the rules, regulations and standards of buildings;
- Read the line sketch and prepare plan, elevations of buildings and gain thoroughknowledge of planning various types of buildings.

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details	BTL
	Ability to explain Fully panelled double leaf door,	
1F3204-CO1	Fully Panelled single leaf door, Flush door and Fully	U-2
	Panelled window with grill	
152204 002	Ability to create Drawing Knowledge of various types	<u> </u>
113204-002	of buildings using manual drafting.	C-0
153204 CO3	Ability to draw A residential building with two bed	Λ 3

RATIONALE:

Computers play a very vital role in present day life, more so, in all the professional life of engineering. In order to enable the students, use the computers effectively in drafting, this course offers Computer Aided Drafting of various drawings in civil engineering.

OBJECTIVES:

On completion of the course, the students will be able to

- Know about CAD commands
- Understand building components
- Draw building drawing using CAD software
- Prepare approval drawing for submission to authority

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details	BTL
	Ability to understand various commands used in CAD	
1F3401-CO1	software. Simple Exercises for familiarizing the drawing	U-2

DETAILED SYLLABUS LIST OF EXPERIMENTS

Preparation of drawing using CAD Software

Introduction of CAD software for Preparation of Drawings 5 Hours

- 1. Definition of various commands used in CAD software.
- 2. Simple Exercises for familiarizing the drawing commands in CAD software.

PART - A

Draw the given drawings in Computer and take print out of all drawings in A4 sheetusing Inkjet / laser printer or plotter and produced in file forms as record.

- 1. Section of semicircular Arch
- 2. Elevation of door, partly paneled and partly glazed
- 3. Preparation of Plan showing arrangement of furniture / fixtures and other features with standard sizes for the followings (Each room to be drawn separately- features and furniture may be pasted from the Blocks available in the packages

(i)Living (ii) Bed Room (iii) Kitchen (iv) Toilet

- 4. Steel Structures: Cross section of I, Channel, T, Angle and Tubular section, Compound Beams.
- 5. Section of Load bearing wall from parapet to foundation showing all the details across the section. (Single storey)

PART B

Draw the building drawing using available CAD software

- 6. Plan, Section and Elevation of a single bed roomed building (R.C.C. Roof)
- 7. Plan, Section and Elevation of a Double bed roomed building (R.C.C. Roof)
- 8. Plan, Section and Elevation of a Primary School Building
- 9. Plan, Section and Elevation of a Hospital Building
- 10. Plan, Section and Elevation of a Workshop with steel columns, Steel roof truss andMetal sheet Roofing of about 300 m² area.
- 11. Preparation of approval drawing to be submitted to Corporation or Municipalityshowing required details in one sheet such as
 - a) Site Plan (Land boundary, Building boundary, Car Parking, Passage, sanitarylayout, septic tank location etc.
 - b) G.F. Plan, F.F. Plan, Section and Elevation (line diagram is enough)
 - c) Key Plan
 - d) Septic tank Plan and section (line diagram)
 - e) Rain water harvesting pit (with all detail)
 - f) Typical foundation details (Column foundation or spread footing)
 - g) Title block showing joinery details, Specification, Area statement, colour Index, Title of the property, space for owners Signature and Licensed Surveyor's Signature with address.

AUTONOMOUS EXAMINATION SCHEME OF VALUATION ALLOCATION OF MARKS

TOTAL	100 marks
Viva – voce	5 marks
PART – B	50 marks
PART – A	45 marks

MATERIAL TESTING LAB-I	3	48	25	100*	100	3 Hrs.

* Examinations will be conducted for 100 marks and it will be reduced to 75 marks.

RATIONALE:

The understanding of the structural, physical and mechanical properties and behavior of engineering materials is at the very core of engineering design. A command of this knowledge is essential for all civil engineers. This laboratory provides a hands-on experience with the testing and evaluation of civil engineering materials, including steel, wood, Cements, Aluminium, Brass and Brick.

OBJECTIVES:

On completion of the course, the students will be able to:

- Study of UTM, Torsion testing machine, Hardness tester, Compression testing machine.
- Determine the Material Properties- test conducted on steel, wood, cement, Aluminium, Brass and Brick.

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details	BTL
1F3205-CO1	Ability to Test the impact, tension, compression and torsion	A-4
1F3205-CO2	Ability to Experiment Brinnel's / Rockwell's hardness	A-3
1F3205-CO3	Ability to Test on wooden cubes and solid blocks	A-4

SURVEYING PRACTICE-I	4	64	25	100*	100	3 Hrs.	

* Examinations will be conducted for 100 marks and it will be reduced to 75 marks.

RATIONALE:

The important functions of a diploma civil engineer include the jobs of detailed Surveying, plotting of survey data, preparation of survey maps and setting out works. Field work should be a selected one so that the student can check his work and have an idea of the results and the extent of error in the work done by him. As far as possible, the surveys done should be got plotted, as this will also reveal errors in the work and Develop skill in plotting

OBJECTIVES:

On completion of the course, the students will be able to:

- Handle surveying equipments
- Do practical exercises in Chain surveying, Compass surveying, Levelling and GPS.
 Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details	BTL
1F3206 –CO1	Ability to take measurement and plotting in the field using	A-4

	chain survey.	
	Ability to take measurement of stations by observations	A-4
1F3206 –CO2	of bearing and included angle in the field using compass	
	survey.

15200 -003	to take measurement in the field using compass survey.	
153206 004	Ability to estimate the measurement of height by fly	U-2
173200 -004	levels in the field using dumpy level.	
153206 005	Ability to determine the inverted levels in the field using	A-3
11 5208 -005	dumpy level.	

Legends: R = Remember U= Understand; A= Apply and above levels (BTL-Bloom's revised taxonomy Level)

DETAILED SYLLABUS

PART A

1. CHAIN AND COMPASS SURVEYING

Study of chain, tape and accessories used for chain survey. Study of Prismatic compass, setting up over a station and observe bearings of lines. Running closed traverse and finding the included angles Use Chain / Tape and Compass. Minimum 5 points. Determination of distance between two points when their base is accessible. Use Chain / Tape and Compass. Determination of distance between two points when their base is inaccessible. Use Chain / Tape and Compass.

2 GLOBAL POSITIONING SYSTEM (GPS)

Reading of various Maps like Taluk map, District Map and Topo sheets. Study of Hand held GPS. Measurement of Latitude, Longitude and Altitude using hand held GPS. Selection and marking of routings (Way points) using hand held GPS.

PART B 3. LEVELLING

Study of a Level - Temporary adjustment, taking readings and booking in a field book. Fly leveling Reduction by Height of Collimation method - Minimum 6 points with two change points (Minimum Two exercises) Fly leveling Reduction by Rise and Fall method - Minimum 6 points with two change points (Minimum Two exercises). Fly levelling covering minimum 6 points with 2 inverted readings (Minimum Two exercises). Check levelling and reduction of levels (Minimum Two exercises)

Test & Model Exam 7 Hrs

PART- A

1. CHAIN AND COMPASS SURVEYING

1. Study of chain, tape and accessories used for chain survey.

2. Study of Prismatic compass, setting up over a station and observe bearings of lines.

3. Running closed traverse and finding the included angles Use Chain / Tape and Compass. Minimum 5 points

4. Determination of distance between two points when their base is accessible. Use Chain / Tape and Compass.

5. Determination of distance between two points when their base is inaccessible. Use Chain / Tape and Compass.

2. GLOBAL POSITIONING SYSTEM (GPS)

- 1. Study of Hand held GPS.
- 2. Reading of various Maps like Taluk map, District Map and Topo sheets.
- 3. Measurement of Latitude, Longitude and Altitude using hand held GPS.
- 4. Selection and marking of routings (Way points) using hand held GPS.

PART B

3. LEVELLING

1. Study of a Level - Temporary adjustment, taking readings and booking in a field book.

2. Fly leveling Reduction by Height of Collimation method - Minimum 6 points with two change points

3. Fly leveling Reduction by Rise and Fall method - Minimum 6 points with two change points

4. Fly levelling covering minimum 6 points with 2 inverted readings (Minimum Two exercises).Check levelling and reduction of levels.

AUTONOMOUS EXAMINATION SCHEME OF VALUATION ALLOCATION OF MARKS

Dort A	By lot i. Compass Survey	35 MARKS
Part A	ii.GPS	15 MARKS
Part B	Levelling (Compulsory)	45 Marks
	Viva -Voce	5 Marks
Total		100Marks

		Part	- A	Part - B

1. Chain with	(arrows)	-	6 nos
---------------	----------	---	-------

- 2. Prismatic compass -6 nos.
- 3. Dumpy level -10 nos.
- 4. Levelling staff -10 nos.
- 5. Cross staff -6 nos.
- 6. Ranging rod-2 nos.7. Hand held GPS-6 nos.

IV TERM

ANNEXURE- II

SESHASAYEE INSTITUTE OF TECHNOLOGY (Autonomous), TRICHY-10 1: DIPLOMA IN CIVIL ENGINEERING SYLLABUS F-SCHEME

(To be implemented for the students admitted from the year 2020-21 onwards)

Programme Name	:	DIPLOMA IN CIVIL ENGINEERING
Course Code	:	1F 4301
Term	:	IV
Course Name	:	THEORY OF STRUCTURES

TEACHING AND SCHEME OF EXAMINATION

No of weeks per semester: 16 weeks

	Instructions		Examination			
Subject	Цоцио		Marks			Durati
Jubjeet	/ Week	Semester	Internal Assess ment	Board Examinations	Total	on
THEORY OF STRUCTURES	6	96	25	100*	100	3 Hrs.

* Examinations will be conducted for 100 marks and it will be reduced to 75 marks.

Topics and Allocation of Hours

UNIT	Торіс	Hrs.
-	Slope and deflection of beams & Propped cantilever	22
Ξ	Fixed beam & Continuous beams- Theorem of three moments method.	17
111	Continuous beams-Moment distribution method & Portal frames- Moment distribution method.	17
IV	Columns and Struts & Combined Bending and direct stresses	17
V	Masonry Dams &Earth pressure and Retaining walls	16
	Test & Model Exam	7
	Total	96

RATIONALE:

The properties and behavior of the components of the structure are very essential for the design purpose. It is covered in the subject of Mechanics of Structures - II as a guide line for decision making and checking ultimate capacity & serviceability of structure.

OBJECTIVES:

- At the end of this course, students will be able to determine the Slope and Deflection of determinate beams by area moment method.
- Analysis of propped cantilever, fixed beam, Continuous beam by Theorem of Three moment, and Continuous beams and portal frame by Moment Distribution Method and draw SFD, BMD.
- Define type of arches and analysis three hinged arch.
- Define different types of columns and to find critical load of columns.
- Analysis of columns and chimneys subject to eccentric loading and to find maximum & minimum stresses. Calculation of maximum, minimum stresses & checking stability of masonry dams and retaining walls. Solving problems in the course of study.

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details	BTL
1F4301-CO1	Ability to analyze the slope and deflection of cantilever simply supported and propped cantilever beams.	A-4
1F4301-CO2	Ability to deduce the slope and deflection of fixed beams, and S.F.D AND B.M.D of continuous beams by theorem of three moments.	A-4
1F4301-CO3	Ability to examine S.F.D AND B.M.D of continuous beam by moment distribution method	R-1
1F4301-CO4	Ability to figure out the crippling load combined bending and direct stresses on columns.	A-3
1F4301-CO5	Ability to evaluate the stability of dams and retaining walls.	A-4

Legends: R = Remember U= Understand; A= Apply and above levels (BTL-Bloom's revised taxonomy Level)

DETAILED SYLLABUS

Conter	its: Theory	
Unit	Name of the Topics	Hrs
	CHAPTER:1.1 SLOPE AND DEFLECTION OF BEAMS:	
I	Deflected shapes / Elastic curves of beams with different support conditions –Definition of Slope and Deflection- Flexural rigidity and Stiffness of beams- Mohr's Theorems – Area Moment method for slope and deflection of beams – Derivation of expressions for maximum slope and maximum deflection of standard cases by area moment method for cantilever and simply supported beams subjected to symmetrical UDL & point loads – Numerical problems on determination of slopes and deflections at salient points of Cantilevers and Simply supported beams from first principles and by using formulae CHAPTER:1.2 PROPPED CANTUEVERS	22
	Chatically, determined, and indetermined. Otherstones Otekla, and	
	Statically determinate and indeterminate Structures- Stable and Unstable Structure Examples- Degree of Indeterminacy- Concept of Analysis of Indeterminate beams - Definition of Prop –Types of Props- Prop reaction from deflection consideration –Drawing SF and BM diagrams by area moment method for UDL throughout the span, central and non-central concentrated loads– Propped cantilever with overhang – Point of Contra flexure.	
	CHAPTER:2.1 FIXED BEAMS – AREA MOMENT METHOD	
11	Introduction to fixed beam - Advantages –Degree of indeterminacy of fixed beam- Sagging and Hogging bending moments – Determination of fixing end(support) moments(FEM) by Area Moment method – Derivation of Expressions for Standard cases – Fixed beams subjected to symmetrical and unsymmetrical concentrated loads and UDL – Drawing SF and BM diagrams for Fixed beams with supports at the same level (sinking of supports or supports at different levels are not included) – Points of Contra flexure –Problems- Determination of Slope and Deflection of fixed beams subjected to only symmetrical loads by area moment method – Problems. CHAPTER:2.2 CONTINUOUS BEAMS – THEOREM OF THREE MOMENTS METHOD Introduction to continuous beams – Degree of indeterminacy of continuous beams with respect to number of spans and types of	17
	supports –Simple/Partially fixed / Fixed supports of beams- General methods of analysis of Indeterminate structures – Clapeyron's theorem of three moments – Application of Clapeyron's theorem of three moments for the following cases –Two span beams with both ends simply supported or fixed –Two span beams with one end fixed	

	and the other end simply supported – Two span beams with one end simply supported or fixed and other end overhanging –Determination of Reactions at Supports- Application of Three moment equations to Three span Continuous Beams and Propped cantilevers –Problems- Sketching of SFD and BMD for all the above cases.	
111	CHAPTER:3.1 CONTINUOUS BEAMS – MOMENT DISTRIBUTION METHOD Introduction to Carry over factor, Stiffness factor and Distribution factor –Stiffness Ratio or Relative Stiffness- Concept of distribution of un balanced moments at joints - Sign conventions– Application of M-D method to Continuous beams of two / three spans and to Propped cantilever (Maximum of three cycles of distribution sufficient) –Finding Support Reactions- Problems - Sketching SFD and BMD for two / three span beams. CHAPTER:3.2 PORTAL FRAMES – MOMENT DISTRIBUTION METHOD Definition of Frames – Types – Bays and Storey - Sketches of Single/Multi Storey Frames, Single/Multi Bay Frames- Portal Frame – Sway and Non- sway Frames- Analysis of Non sway (Symmetrical) Portal Frames for Joint moments by Moment Distribution Method and drawing BMD only– Deflected shapes of Portal frames under different loading / support conditions.	17
IV	CHAPTER:4.1 COLUMNS AND STRUTS Columns and Struts –Definition– Short and Long columns– End condition Equivalent length / Effective length– Slenderness ratio – Axially loaded short column - Axially loaded long column – Euler's theory of long columns – Derivation of expression for Critical load of Columns with hinged ends –Expressions for other standard cases of end conditions (separate derivations not required) – Problems – Derivation of Rankine's formula for Crippling load of Columns– Factor of Safety- Safe load on Columns- Simple problems CHAPTER:4.2 COMBINED BENDING AND DIRECT STRESSES Direct and Indirect stresses – Combination of stresses –Eccentric loads on Columns Effects of Eccentric loads / Moments on Short columns – Combined direct and bending stresses – Maximum and Minimum stresses in Sections– Problems – Conditions for no tension – Limit of eccentricity – Middle third rule – Core or Kern for square, rectangular and circular sections Chimneys subjected to uniform wind pressure –Combined stresses in Chimneys due to Self weight and Wind load- Chimneys of Hollow square and Hollow circular cross sections only – Problem	17

	CHAPTER:5.1 MASONRY DAMS	
	Gravity Dams – Derivation of Expression for maximum and minimum	
	stresses at Base – Stress distribution diagrams – Problems – Factors	
	affecting Stability of masonry dams – Factor of safety- Problems on	
	Stability of Dams– Minimum base width and maximum height of dam for	
	no tension at base – Elementary profile of a dam – Minimum base width	
	of elementary profile for no tension-Middle third rule.	
	CHAPTER: 5.2 EARTH PRESSURE AND RETAINING WALLS	
V	Definition – Angle of repose /Angle of Internal friction of soil- State of	
	equilibrium of soil – Active and Passive earth pressures – Rankine's	
	theory of earth pressure – Assumptions – Lateral earth pressure with	
	level back fill / level surcharge (Angular Surcharge not required)-	40
	Earth pressure due to Submerged soils – (Soil retained on vertical	16
	back of wall only) – Maximum and minimum stresses at base of	
	Trapezoidal Gravity walls – Stress distribution diagrams – Problems –	
	Stability of earth retaining walls – Problems to check the stability of	
	walls- Minimum base width for no tension.

RATIONALE:

Construction of roads is one of the areas in which diploma holders in Civil Engineering get employment. These diploma holders are responsible for construction and maintenance of highways. Basic concepts of road geo-metrics, surveys and plans, elements of traffic engineering, road materials, construction of rigid and flexible pavements, special features of hill roads, road drainage system and various aspects of maintenance find place in above course.

In addition, this subject will cater the needs of those technicians who would like to find employment in the construction of railway tracks, bridges. The subject aims at providing broad based knowledge regarding various components and construction of railway track, bridges.

OBJECTIVES:

On completion of the course, the students will be able to:

- Study the importance of the roads, development of roads and classification of roads.
- Know about highway pavements, Geometrical design, Traffic controls, RoadArboriculture and Highway Lighting
- Study the highway alignment, road machineries and construction of different typesof Roads
- Study the Railway fixtures, Types of stations, Signalling and Control of movement oftrains
- Study the Maintenance of Track and Rapid Transport System of Railways
- Know about Bridges, Classifications and its Components

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details	BTL
154302 001	Ability to evaluate Objects of Highway planning , I S	A 4
174302-001	Classification of soils	A-4
154202 002	Ability to estimate Principles for ideal highway	11.2
1F4302-CO2	alignment, Factors considered in alignment	0-2
	Ability to Illustrate the Classifications of Indian	
1F4302-CO3	Railways, Maintenance of Track, Bridges and Rolling	A-2
	stock	
1F4302-CO4	Ability to Understand Purpose of railway station& -	U-2

	Types of stations, Underground railways			
1F4302-CO5	Ability to Evaluate IRC loadings and Importance of	Δ_1		
	bearings	A-4		

Legends: R = Remember U= Understand; A= Apply and above levels (BTL-Bloom's revised taxonomy Level)

DETAILED SYLLABUS

Contents: Theory

Unit	Name of the Topic	Hrs		
	CHAPTER:1.1			
	INTRODUCTION:			
	General –Development of Roads in India - Modes of			
	transportation -Nagpur Plan - Ribbon development -Advantages of			
	Roads - Importance of roads in India - Requirements of an ideal			
	road - Indian Road Congress - Objects of Highway planning -			
	Classifications of Highways.			
	CHAPTER:1.2 HIGHWAY PAVEMENTS:			
	Objectives – Types of Pavement – Flexible and Rigid Pavements -			
	Comparative study of Flexible and Rigid pavements - Factors			
	affecting the design of pavements - Other types of pavements			
	(Description not reqd.)			
	CHAPTER: 1.3 GEOMETRICAL DESIGN OF HIGHWAYS:			
	General - Road structure - Right of way - Land width - Width of			
	formation - Road Camber - Super elevation -Sight distances -Road			
I	gradient -Road Curves - Horizontal curves-Vertical curves -Types -	15		
	Widening of pavement on horizontal curves.			
	CHAPTER:1.4 TRAFFIC ENGINEERING:			
	Objectives -Traffic surveys- Road accidents-Causes of road			
	accidents - Preventive measures - Parking – Methods of parking -			
	Road junctions (Grade intersections and Grade separators) -			
	Traffic signals - Advantages - Types of road sign -Expressways.			
	CHAPTER:1.5 SUB GRADE SOIL:			
	Significance - Soil mass as a three phase system - Grain size-			
	classification- Atterberg limit - Definition and description- IS			
	Classification of soils- Compaction Definition - Objects of			
	compaction - Standard Proctor Compaction test - Shear strength -			
	Definition - importance - Direct shear test.			
	CHAPTER: 1.6 ROAD ARBORICULTURE AND LIGHTING:			
	Objects of Arboriculture - Selection of trees - Location of trees -			
	Highway lighting - benefits.			
	HIGHWAY ENGINEERING (Contd.):			
11	CHAPTER:2.1 HIGHWAY ALIGNMENT AND SURVEYS:	15		
	Definition –Principles for ideal highway alignment -Factors affecting	_		
	highway alignment –Surveys-Engineering surveys -Reconnaissance,			

r	Destinging and Lagetian surveys Design Depart and Description	
	Preliminary and Location surveys - Project Report and Drawing -	
	CHAPTER:2.2 ROAD MACHINERIES:	
	Excavating equipments-Tractor, Bull dozer, Grader, Scraper, J C B -	
	Compaction equipments -Road roller -Types and description -	
	Equipment for Bituminous road.	
	CHAPTER:2.3 LOW COST ROADS:	
	General-Classifications -Earthen road, Gravel road, Water Bound	
	Macadam roads - Construction with sketches – Advantages and	
	disadvantages - Maintenance - Soil stabilization - Methods.	
	CHAPTER:2.4 BITUMINOUS ROADS:	
	General - Advantages and disadvantages - Bituminous materials	
	used - Types of Bituminous roads-Surface dressing -Types-	
	Bituminous Concrete - Maintenance of Bituminous roads.	
	CHAPTER:2.5 CEMENT CONCRETE ROADS:	
	General - Advantages and disadvantages - Methods of construction	
	of cement concrete roads with sketches - Construction procedure	
	for concrete roads.	
	CHAPTER:2.6 HILL ROADS:	
	Factors considered in alignment -Formation of hill roads- Hairpin	
	bends -Retaining and Breast walls.	
	CHAPTER:2.7 PARKING	
	Latest & Advanced parking Facilities at Metro Cities	
	RAILWAYENGINEERING:	
	CHAPTER:3.1 INTRODUCTION:	
	Introduction to Railways -Classifications of Indian Railways -Rail	
	Gauges - Types - Uniformity in gauges - Loading gauge-	
	Construction gauge.	
	CHAPTER: 3.2 RAILS:	
	General-Functions of rails -Requirements of an ideal rail - Types of	
	rail sections - Length of rails -Welding of rails - Wear of rails - Coning	
	of wheels - Hogged rails - Bending of rails – Creep of rails - Causes	
	and prevention of creep.	
111	CHAPTER: 3.3 SLEEPERS AND BALLAST:	15
	Functions of Sleepers - Types of sleepers - Requirements of	
	sleepers - Materials for sleepers - Sleeper density – Ballast-	
	Functions of Ballast – Requirements of ballast -Materials used as	
	hallast	
	CHAPTER:3.4 RAIL FASTENINGS AND PLATE LAYING:	
	Rail joints -Types -Rail fastenings -Fish plates -Fish holts-Spikes -	
	Chairs and Keys - Bearing plates - Blocks - Elastic fastenings -	
	Anchors and anti-creeners - Plate laving. Methods of plate laving	
	PORS method of relaying	
	runo memou or relaying.	

	CHAPTER: 3.5 MAINTENANCE OF TRACK:			
	Necessity - Maintenance of Track, Bridges and Rolling stock			
	RAILWAY ENGINEERING (Contd.)			
	CHAPTER:4.1 STATIONS AND YARDS:			
	Definition of station -Purpose of railway station - Types of stations -			
	Wayside, Junction and Terminal stations -Platforms- Passenger			
	and Goods platforms - Definition of Yard -Types of yard -			
	Passenger yard, Goods yard, Marshalling yard and Locomotive			
	yards - Level crossings.			
	CHAPTER:4.2 STATION EQUIPMENTS:			
	General - Engine shed - Ash pits – Examination pits - Drop pits –			
	Water columns - Triangles – Turn table - Traverse – Scotch Block –			
	Buffer stops – Fouling marks - Derailing switch - Sand hump - Weigh			
	bridges.			
	CHAPTER:4.3 POINTS AND CROSSINGS			
	Purpose – Some definitions – Turnouts – Right hand and left hand			
	turnouts –Sleepers laid for points and crossings - Types of switches -			
IV	Crossings - Types of crossings.	14		
	CHAPTER:4.4 SIGNALLING:			
	General – Objects of signalling - Types of signalling –Based on			
	function and location – Special signals – Control of movement of			
	trains –Different methods Following train system - Absolute block			
	system – Automatic signalling - Pilot guard system - Centralized			
	traffic control system.			
	CHAPTER:4.5			
	INTERLOCKING:			
	Definition – Principles of interlocking - Methods of interlocking-			
	Tappets and locks system –Key system - Route relay system -			
	Improvements in interlocking and signalling.			
	CHAPTER:4.6			
	RAPIDTRANSPORTSYSTEM:			
	General - Underground railways - Advantages - Tube railways - Its			
	features			
	CHAPTER:5.1			
	INTRODUCTION:			
	Bridge: Definition- Components of bridge- IRC loadings- Selection of			
	type of bridge- Scour- Allux- Economic span- waterway- Factors			
V	governing the ideal site for bridge- Alignment of bridge -Factors to	14		
	CHARTER. 3.2 FOUNDATIONS:			
	foundations of roundation- Types of roundations-selection of			
	foundation Coffer dam Types			
	iounuauon -Coner uam-rypes.			

CHAPTER: 5.3 CLASSIFICATION OF BRIDGES:	
Classification according to IRC loadings, Materials, Bridge floor,	
Type of superstructure-Culverts and Cause ways- Classifications	
with sketches - Conditions to construct causeways.	
CHAPTER:5.4 SUBSTRCTURE :	
Abutments – types – piers – types – wing walls – types.	
CHAPTER: 5.5 SUPERSTRUCTURE	
Types- Description-Simple bridge- Types according to bridge floor -	
Continuous bridge - Cantilever bridge - Balanced cantilever bridge-	
Arch bridge - Bow-string girder type bridge- Rigid frame bridge-	
Suspension bridge- Continuous steel bridges- Steel arched	
bridges.	
CHAPTER:5.6	
BRIDGE BEARINGS:	
Definition -Purpose-Importance of bearings – Types of bearings–	
Elastomer bearings-pot bearing	
Test &model exam	7

RATIONALE:

Subject of hydraulics is a science subject and helps in solving problems in the field of Aeronautical, Electronics, Electrical, Mechanical, Metallurgical Engineering subject. The subject deals with basic concepts and principles in hydrostatics, hydro- kinematics and hydrodynamics and their application in solving fluid flow problems.

OBJECTIVES:

On completion of the course, the students will be able to:

- Define the properties of fluids and their physical quantities.
- List the different types of pressures and various pressure measuring devices.
- Calculate hydrostatic forces on plane surfaces immersed in water.
- Understand types of forces, energy and application of Bernoulli's theorem.
- Know the different types of Orifices and Mouthpieces and to derive dischargeformulae and their practical applications.
- State the different losses of head of flowing liquids in pipes and their equations.
- Know the different types of Notches and Weirs, and deriving the discharge formulasand their Practical applications.
- Study the different types of Channels and their discharge formulas and to determine the condition for maximum discharge.
- Learn the construction details, specifications and efficiencies of ReciprocatingPumps and Centrifugal Pumps

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details	
1F4207 -CO1	Ability to deduce the different types of pressure.	
1F4207 -CO2 Ability to organize the flow of fluids and hydraulic co- efficient.		
1F4207 -CO3	Ability to organize the flow of fluids through notches and weirs.	A-4
1F4207 -CO4	Ability to organize the flow of fluids through pipes and channels.	A-6
1F4207 -CO1	Ability to illustrate the construction details, specifications, discharge, power and efficiency of pumps.	A-3

Legends: R = Remember U= Understand; A= Apply and above levels (BTL-Bloom's revised taxonomy Level)

DETAILED SYLLABUS

Conter	Contents: Theory					
Unit	Name of the Topics	Hrs				
	 CHAPTER :1.1 INTRODUCTION Hydraulics –Definition-Properties of fluids - Mass, force, weight, specific volume, specific gravity, specific weight, density, relative density, compressibility, viscosity, cohesion, adhesion, capillarity and surface tension-Dimensions and Units for area, volume, specific volume, velocity, acceleration, density, discharge, force, pressure and power. CHAPTER :1.2 MEASUREMENT OF PRESSURE Pressure of liquid at a point — Intensity of pressure - Pressure 	6				
I	head of liquid – Conversion from intensity of pressure to pressure head and vice- versa - Formula and Simple problems - Types of pressures - Static pressure, Atmospheric pressure, Gauge pressure, Vacuum pressure and Absolute pressure- Simple problems - Measurement of pressure - Simple mercury barometer - Pressure measuring devices- Piezometer tube - Simple U-tube manometer - Differential manometer – Micrometer - Problems.	9				
	CHAPTER :1.3 HYDROSTATIC PRESSURE ON SURFACES Pressure on plane surfaces - Horizontal, vertical and inclined surfaces- Total pressure-Centre of pressure - Depth of centre of pressure - Resultant pressure — Problems on Practical application - Sluice gates, Lock gates and Dams- Descriptions.	5				
	CHAPTER :2.1 FLOW OF FLUIDS	8				
	Types of flow – Laminar and turbulent flow - Steady and unsteady flow – Uniform and Non-uniform flow - Equation for continuity of flow (law of conservation of mass)- Energy possessed by a fluid body - Potential energy and Potential Head –Pressure energy and Pressure Head - Kinetic Energy and Kinetic Head - Total Energy and Total Head –Bernoulli	6				
II	theorem – (No proof) – Problems on Practical applications of Bernoulli's theorem-Venturimeter - Orificemeter (Derivation not necessary) - Simple problems. CHAPTER :2.2 FLOW THROUGH ORIFICES AND	o				
	MOUTHPIECES Definitions- Types of orifices - Vena contracta and its significance – Hydraulic coefficients Cd, Cv and Cc - Formula - Simple problems - Large orifice — Definition — Discharge formula — Simple problems - Practical applications of orifices – Types of mouthpieces - External and internal mouthpieces - Discharge formula - Simple problems.	6				

	CHAPTER :2.3 FLOW THROUGH PIPES					
	Definition of pipe-Losses of head in pipes – Major losses - Minor					
	losses - Sudden enlargement, sudden contraction, obstruction ir					
	pipes (no proof)- Simple problems – Energy / Head losses of					
	flowing fluid due to friction - Darcy"s equation - Chezy"s					
	equation (No derivation) — Problems - Transmission of					
	power through pipes – Efficiency - Pipes in parallel					
	connected to reservoir - Discharge formula - Simple problems.					
	CHAPTER :3.1 FLOW THROUGH NOTCHES					
	Definitions- Types of notches – Rectangular, Triangular and	6				
	Trapezoidal notches – Derivation of equations for discharges -					
	Simple problems - Comparison of V-Notch and Rectangular					
	Notch.					
	CHAPTER :3.2 FLOW THROUGH WEIRS					
	Definitions - Classification of weirs - Discharge over a rectangular	10				
	weir and trapezoidal weir – Derivation – Simple problems – End					
	contractions of a weir – Franci"s and Bazin"s formula – Simple					
	problems - Cippoletti weir – Problems - Narrow crested weir –					
	Sharp crested weir with free over fall - Broad crested weir -					
	Drowned or Submerged weirs - Suppressed weir - Stepped weir -					
	Problems - Definition of terms - Crest of sill, Nappe or Vein, Free					
	discharge - Velocity of approach –Spillways.					
	CHAPTER :4.1 FLOW THROUGH OPEN CHANNELS					
	Definition - Classification - Rectangular and Trapezoidal channels					
	– Discharge – Chezy"s formula, Bazin"s formula and Manning"s					
	formula - Hydraulic mean depth – Problems - Conditions of					
	rectangular/trapezoidal sections - Specific energy, critical					
	depth –Conditions of maximum					
IV	discharge and maximum velocity - Problems - Flow in a					
	venturiflume –	15				
	Uniform flow in channels – Flow through a sluice gate – Types of					
	channels – Typical cross- sections of irrigation canals - Methods					
	of measurements of velocities – Channel losses - Lining of canals					
	 Advantages of lining of canals - Types of lining- Cement 					
	concrete lining with sketches - Soil cement lining with sketches -					
	LDPE lining.					
	CHAPTER :5.1 PUMPS					
	Pumps – Definition – Difference between a pump and a turbine-					
	Classification of pumps - Positive displacement pumps and roto-					
V						
•	dynamic pressure pumps - Characteristics of modern pumps -	18				
	dynamic pressure pumps - Characteristics of modern pumps - Maximum recommended suction, lift and power consumed-	18				
	dynamic pressure pumps - Characteristics of modern pumps - Maximum recommended suction, lift and power consumed- Reciprocating pump - Construction detail and working principle -	18				

Discharge and Efficiency- Problems - Centrifugal pump
Advantages and disadvantages over a reciprocating pump -
Layout - Construction details – Priming of centrifugal pump –
Working of the pump – Classification – Functions of Foot valve,
Delivery valve and Non- return valve – Fundamental equation of
centrifugal pump - Characteristics of a centrifugal pump –
Discharge, power and efficiency
- Problems - Specifications of centrifugal pump s and their
sections- Hand pump - Jet pump- Deep well pump - Plunger
pumps - Piping system- Computation of power required for
pumps, Other types of pumps (not for exam)- Selection and
choice of pump.7
Hrs.

SESHASAYEE INSTITUTE OF TECHNOLOGY (Autonomous), TRICHY-10 1: DIPLOMA IN CIVIL ENGINEERING SYLLABUS

F-SCHEME

(To be implemented for the students admitted from the year 2020-21 onwards)

Programme Name	:	DIPLOMA IN CIVIL ENGINEERING
Course Code	:	1F4208
Term	:	IV
Course Name	:	HYDRAULICS LABORATORY

TEACHING AND SCHEME OF EXAMINATION

No of weeks per semester: 16 weeks

Subject	Instructions		Examination			
		Hours /				
	Subject	Hours / Week	Semest er	Internal Assessme nt	Board Examinations	Total
HYDRAULICS LABORATORY	4	64	25	100*	100	3 Hrs.

* Examinations will be conducted for 100 marks and it will be reduced to 75 marks.

RATIONALE:

Subject of hydraulics lab is a practical subject which deals with the basic concepts and principles in hydrostatics, hydro-kinematics and hydrodynamics and their applications insolving fluid flow problems.

OBJECTIVES:

On completion of the course, the students will be able to:

- Understand parameters associated with fluid flow and hydrostatic pressure.
- Measure the fluid pressure using manometers
- Determine the co-efficient of discharges of Orifice, mouthpiece, orifice meter, venturimeter, notches etc.,
- Determine pipe friction factor

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details	BTL
1E4208 -CO1	Ability to Experiment the Bernouli's Theorem , Venturi	
11 4200 -001	and orifice meter	A-3
	Ability to Determine the co efficient of Discharge	
1F4208 -CO2	through orifice And with External cylindrical mouth	A-3
	piece	
1F4208 -CO3	Ability to Test the friction factor	E-5
154208 004	Ability to Determine the co efficient of discharge with	۸ 3
11 4208 -004	rectangular and V notch	
1E4208 -CO5	Ability to Draw the Reciprocating pump	۸_3
11 4200 -005	Centrifugal pump	A-3

Legends: R = Remember U= Understand; A= Apply and above levels (BTL-Bloom's revised taxonomy Level)

DETAILED SYLLABUS HYDRAULICS LABORATORY Contents: Practical

List of Experiment Hrs	S
1. Flow of Fluids:	
Verification of Bernoulliss theorem.	
Flow through Venturimeter – Determination of Co-efficient of Discharge.	
Flow through Orificemeter – Determination of Co-efficient of Discharge.	
2. Flow through orifice:	
Determination of Co-efficient of Discharge by Time fall - Head method.	
Determination of Co-efficient of Discharge by Constant head method.	
3. Flow through external cylindrical mouth piece:	
Determination of Co-efficient of Discharge by Timing fall in head method. 57	7
Determination of Co-efficient of Discharge by Constant head method.	
4. Flow through pipes:	
Determination of friction factor for the given GI pipe / PVC pipe.	
5. Flow through notch:	
Determination of Co-efficient of Discharge for Rectangular Notch / V-Notch.	

6. Pumps:	
Reciprocating pump – To draw characteristic curves and determine the	
efficiency.	
Centrifugal pump – To draw characteristic curves and determine the efficiency	
Study of working principle of a pelton wheel.	
Toot & Model Exam	7
Test & Model Exam	Hrs.
Total	64
i Otal	Hrs.

AUTONOMOUS EXAMINATION SCHEME OF VALUATION

In the examination question has to be given either as a single question from Part A or two questions, one from Part B and another from Part-C.

ALLOCATION OF MARKS

MATERIAL TESTING LAB-II	3	48	25	100*	100	3 Hrs.	

* Examinations will be conducted for 100 marks and it will be reduced to 75 marks.

RATIONALE:

The understanding of the structural, physical and mechanical properties and behaviour of engineering materials is at the very core of engineering design. A command of this knowledge is essential for all civil engineers. This laboratory provides hands-on experience with the testing and evaluation of civil engineering materials, including sand, clay, fine aggregates, course aggregates and water.

OBJECTIVES:

On completion of the course, the students will be able to:

- Test the properties of fine aggregate and coarse aggregate.
- Test the properties of soil.
- Analyze the properties of water/waste water

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

СО	Details	BTL
454202 004	Ability to Determine the voids ratio porosity, liquid limit, plastic	۸ 3

RATIONALE:

Diploma holders in Civil Engineering are supposed to supervise construction of buildings. To perform the above task, it is essential that students should have knowledge of various sub components of buildings like foundations, walls, roofs, stair cases, floors etc., and their constructional details. Therefore, the subject of Construction Practice is very important for Civil Engineering diploma holders.

OBJECTIVES:

On completion of the course, the students will be able to:

- Prepare center line plan and foundation plan for a building.
- Set out foundation in the field for spread footing and column footing for a building.
- Determine the Workability of concrete by Compacting factor, slump cone test and Vee Bee consistometer test.
- Cast Concrete cubes and to test for compressive strength.
- Determine the fineness Modulus of fine and coarse aggregate.
- Perform Shape test on coarse aggregate.

- Determine the bulking characteristics of the given sand.
- Perform Non-Destructive test on hardened concrete

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

СО	Details	BTL	
	Ability to understand the arrangements of bricks using		
1F4304 -CO1	English Bond in one brick thick/one and half brick at corner,	U-2	
	Tee junction and pillars.		
1F4304 -CO2	Ability to measure flooring,/brick work /colour washing.	E-5	
454204 002	Ability to estimate centre line dimension and setting out	A 4	
164304 -003	foundation plan in the field.	A-4	
154204 004	Ability to estimate centre line dimension and setting out	A 4	
1F4304 -CO4	foundation plan in the field.	A-4	
	Ability to understand the arrangements of bricks using		
1F4304 -CO5	English Bond in one brick thick/one and half brick at corner,		
	Tee junction and pillars.		

Legends: R = Remember U= Understand; A= Apply and above levels (BTL-Bloom's revised taxonomy Level)

DETAILED SYLLABUS

CONSTRUCTION PRACTICE LABORATORY

Contents: Practical

Part A :

27 Hrs.

- Identify various sizes of available coarse aggregates from sample of 10 kg in laboratory and prepare report (60,40, 20,10 mm).
- Identify the available construction materials in the laboratory on the basis of theirsources.
- Identify the grain distribution pattern in given sample of teak wood in the laboratory and draw the various patterns. (along and perpendicular to the grains).
- Identify various layers and types of soil in foundation pit by visiting at least 3 construction sites in different locations of city and prepare report consisting photographs and samples.
- Select first class, second class and third class bricks from the stake of bricks and prepare report on the basis of its properties.
- Measure dimension of 10 bricks and find average dimension and weight. Perform field tests - dropping, striking and scratching by nail and correlate the results obtained.
- Apply the relevant termite chemical on given damaged sample of timber.
- Apply two or more coats of selected paint on the prepared base of a given

wall surface for the area of 1m x 1m using suitable brush/ rollers adopting safe practices.

• Prepare mortar using cement and Sand/ Fly ash or Granite/marble polishing waste in the proportion 1:6 or 1:3.

Part B

30 Hrs.

- Prepare and develop a centre line plan, foundation Plan and set o spread footing in the field for the given line sketch of a building.
- Prepare and develop a centre line plan, foundation Plan and set out the layout of columns and footing in the field for the given line sketch of a building(Framed structure).
- Arrangement of bricks using English bond for one brick thick wall and one and half brick thick wall for right angled corner junction.
- Arrangement of bricks using English Bond for one brick thick wall, one and half brick thick wall for Tee junction.
- Arrangement of bricks using English bond for one brick thick, one and halfand two brick thick square pillars.
- Straightening, cutting, hooking and bending and arrangement of Steel reinforcement bars.
- a. Singly reinforced beam b. Lintel and Sunshade c. Column and footing

Test & Model Exam

7 Hrs.

AUTONOMOUS EXAMINATION SCHEME OF EXAMINATION:

In the examination the students have to be given two experiments one from Part A and another from Part-B.

SURVEYING PRACTICE-I	4	64	25	100*	100	3 Hrs.

* Examinations will be conducted for 100 marks and it will be reduced to 75 marks.

RATIONALE:

The important functions of a civil technician include the jobs of detailed surveying, plotting of survey data, preparation of survey maps and setting out works. While framing the curriculum for the subject of surveying, stress has been given to the Development of the skill in each type of survey like Theodolite surveying, Tachometric Surveying and surveying using Total station that the Civil engineering diploma holder Will normally be called upon to perform.

OBJECTIVE:

- At the end of the course, students will have experiences:
- In handling surveying equipment.
- To do practical exercises in Theodolite surveying.
- To do Tachometric surveying.
- To do surveying using Total station

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details	BTL
154305 -001	Ability to estimate the horizontal angle, distance between two	
11 4303 -001	points when their bases are accessible /inaccessible.	~-+

154305 004	Ability to measure distance and area to plot traverse/ area of a	E
164303 -004	field by total station.	E-9
	Ability to propose road/canal alignment by L.S & C.S, road	
1F4305 -CO5	curve setting by deflection angle, plotting and finding the area	C-6
	of the filed by total station.	

Legends: R = Remember U= Understand; A= Apply and above levels (BTL-Bloom's revised taxonomy Level)

DETAILED SYLLABUS

LIST OF EXPERIMENTS

PART A: THEODOLITE SURVEYING

- 1. Study of a Theodolite Temporary adjustments Reading horizontal angles.
- 2. Measurement of horizontal angle by:
- i. Reiteration method (not for Exam) ii. Repetition method (not for Exam)3. Determination of distance between two points when their bases are
- accessible, using Theodolite Measuring Horizontal angles by repetition method and distances from a Theodolite Station.
- 4. Determination of distance between two points when their bases are inaccessible, using Theodolite Measuring Horizontal angles by reiteration method from a base line.
- 5. Measurements of vertical angles to different points.
- 6. Determination of Elevation of an object when the base is accessible.
- 7. Determination of Elevation of an object when the base is inaccessible by :a) Single plane method b) Double plane method.
- 8. Run a closed theodolite traverse for measuring length, included angles and bearing at initial Station and Plot the traverse.

PART B: TACHEOMETRIC SURVEYING

- 9. Determination of constants of a tachometer.
- 10. Determination of distance and elevation of points by Stadia tachometry.
- 11. Determination of gradient between two points (with different elevations) by Stadia tachometry.
- 12. Determination of distance and elevation of points by Tangential tachometry.

PART C: TOTAL STATION 16 Hrs

- 13. Study of Total Station General Commands used Instrument preparation and setting reading distances and angles.
- 14. Measurement of distances and co-ordinates of given points, using

Totalstation.

- 15. Measurement of altitude of given elevated points, using Total Station.
- 16. Run closed traverse using Total Station and plotting the traverse.
- 17. Determination of area of a field / land / College Campus etc. using Total station.

Test & Model Exam 7 Hrs

SURVEY CAMP: (Outside the Campus) Duration: 7 days

The objective of the survey camp is to enable the students to get practical training in the field work. Groups of not more than six members in a group will carry out each exercise in Survey camp. The camp must involve work on a large area of not less than 30 acres outside the campus. At the end of the camp, each student shall have mapped and contoured the area. The camp record shall include all original field observations, calculations and plotting.

20 marks to be allotted for Survey file in the Board Examination for the works carried out by the students in survey camp:

- i. L.S and C.S for a road / canal alignment
- ii. Radial Tachometric contouring
- iii. Contouring by block levels
- iv. Curve setting by deflection angle
- v. Theodolite / Tacheometric traverse (Balancing the traverse by Bowditch rule)
- vi. Total Station (Closed Traverse) Plotting & Finding the area of the given field.

Test & Model Exam		7
	Total	96

RATIONALE:

Being the basic engineering subject, this imparts basic knowledge and skill regarding properties of materials, concept of stresses and strains, bending moment and shear force diagrams, second moment of area, bending and shear stresses, slope and deflection and analysis of trusses. The above knowledge will be useful for designing simple structural components. This subject is very important to develop basic concepts and principles related to structural mechanics. This subject is much essential for the students to continue their further education.

OBJECTIVES:

At the end of this course, students will be able to

- Design of beam including shear.
- Design of one way slab and two way simply supported slab and continuous slab .
- Design of column and column footing &simple beam in steel structures and Design of compression and tension members in steel structures
 Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details	BTL
1E5306-CO1	Ability to design of R.C.C beams(Singly and doubly) for flexure by L.S.M.	C-6
1E5306-CO2	Ability to develop of R.C.C T-beams for flexure and shear for beams by L.S.M.	C-6
1E5306-CO3	Ability to propose of R.C.C one way slab, columns and column footings.	C-6
1E5306-CO4	Ability to design of steel structures for simple beams and welded connections.	C-6
1E5306-CO5	Ability to design of steel structures for tension and compression members.	C-6

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

	FLEXURE BY L.S.M	
	Design requirements-Effective spans of cantilever and simply	
	supported beams – Breadth and depth requirements of beams –	
	Control of deflection – Minimum depth requirement for stiffness –	
	Minimum concrete cover to reinforcement steel for durability and	
	fire resistance – Minimum and maximum areas/ spacing for main	
	reinforcement and side face reinforcement as per IS 456 -2000 -	
	Development Length-Anchorage values of bends and hooks -	
	Curtailment of reinforcements- Design bending moments -	
	Design of singly and doubly reinforced rectangular beams	
	(Cantilevers and Simply supported beams carrying udl only)-	
	Problems- Practice on using Design Aids, SP16 (Description	
	only).	

	CHAPTER :2.1 DESIGN OF T-BEAMS AND LINTELS FOR	
I	 FLEXURE BY L.S.M Cross sections of Tee and L-beams- Effective width of flange-Neutral Axis and M.R of Singly Reinforced T-Sections- Design of singly reinforced T-beams for flexure–Problems on Simply supported T- beams carrying udl only – Loads on Isolated Lintels over openings of masonry walls - Design B.M for isolated lintels carrying rectangular/triangular loads- Design of Lintel- Simple problems CHAPTER :2.2 DESIGN OF CONTINUOUS BEAMS FOR FLEXURE AND SHEAR BY L.S.M Methods of analysis of continuous beams- Effective Span-Arrangement of Loading for Critical Bending Moments- B.M coefficients specified by IS:456-200-Design of rectangular continuous beams (Singly and Doubly Reinforced) using B.M. coefficients (equal spans & u.d.l only) for sagging and hogging moments. Limit state of collapse in shear – Design shear strength of concrete – Design shear strengths of vertical / inclined stirrups and bent up bars –Principle of shear design – Critical sections for shear- S.F Coefficients specified by IS:456-2000– Nominal shear stress –Minimum shear reinforcement-Design of vertical stirrups for rectangular beams using limit state method –Simple problems- Practice on use of Design Aids (Description only). 	17
111	CHAPTER :3.1 DESIGN OF ONE WAY SLABS AND STAIRCASES BY L.S.M Classification of Slabs – Effective spans – Loads (DL and IL) on floor/roof slabs and stairs (IS: 875-1987) – Strength and Stiffness requirements –Minimum and maximum permitted size, spacing and area of main and secondary reinforcements as per IS 456 - 2000- Cover requirement to reinforcements in slabs- Design of cantilever/simply supported one way slabs and sunshades by limit state method – Design of continuous slabs using B.M coefficients- Check for shear and stiffness – Curtailment of tension reinforcement –Anchoring of reinforcement– Practice in designing slabs using design aids (Description only). Types of stairs according to structural behaviour- Requirements of Stairs- Planning a staircase – Effective span of stairs – Effective breadth of flight slab- Distribution of loads on flights – Design of cantilever steps – Design of doglegged stairs spanning parallel to the flight - Planning of open well staircase. CHAPTER :3.2 DESIGN OF TWO WAY SLABS BY L.S.M Introduction –Effective spans –Thickness of slab for strength and	20

	stifferen and string provide Addition of Education and	
	coefficients as per IS:456 – Design B.Ms for Simply supported,	
	Restrained and Continuous slabs – Tension and Torsion	
	coefficients – Curtailment of reinforcement –	
	CHAPTER '4 1 DESIGN OF COLUMNS BY LS M	
IV	CHAPTER :4.1 DESIGN OF COLUMNS BY L.S.M Limit state of collapse in compression – Assumptions - Limiting strength of short axially loaded compression members - Effective length of compression members – Slenderness limits for columns – Classification of columns -Minimum eccentricity for column loads – Longitudinal and Transverse reinforcement requirements as per I S 456-2000 – Cover requirement - Design of axially loaded short columns with lateral ties / helical reinforcement – Practice on use of Design Aids (Description only). CHAPTER :4.2 DESIGN OF COLUMN FOOTINGS Basic requirements of Footings-Types of R.C footings –Minimum depth below GL- Footings with uniform thickness and varying thickness (sloped footing) – Critical sections for BM, Transverse/Punching Shears – Minimum reinforcement, Distribution of reinforcement, Development length, Anchorage, Cover, Minimum edge thickness requirements as per IS 456- 2000 – Design of Isolated footing (square and rectangular) with uniform/ varying thickness by limit state method- For Examination : Problem either on (i) Designing Size of Footing and Area of tension steel for flexure only for the given Column load and SBC of soil, or on (ii) Checking the footing for Punching shear and Transverse shear only, for the given sizes and other required details of the footing.	16
	CHAPTER :5.1 DESIGN OF TENSION AND COMPRESSION	
	MEMBERS BY L.S.M	
	General- Characteristic Actions, Partial Safety Factors for Loads,	
	Design Actions- Ultimate Strength, Partial Safety Factors for Mate	erials,
	Design Strengths of Materials - Rolled Steel Sections - Different f	orms
V	of Tension members – Gross area, Net area and Net Effective	18
v	sectional area of Tension members– Maximum permitted values of	of ¹⁰
	Effective Slenderness Ratio –Design Strength of single angle Ten	sion
	members against Yielding of Gross section and Rupture of Critica	
	section - Block Shear (Description only) - Design of ties using sing	gle
	angles and channel sections.	
	Different forms of Compression members- Classification of Cross	
	sections- Limiting vilotin to Thickness Ratio- Effective sectional	

area- End Conditions and Effective length of Compression members - Maximum permitted values of Slenderness ratio -Imperfection factor and Stress reduction factor– Design Strength of Compression members- Problems — Design of single angle and double angle Struts – Design of steel columns using rolled steel sections (Symmetrical sections only) without cover plates. (Lacing and battens not included). CHAPTER :5.2 DESIGN OF SIMPLE BEAMS AND WELDED **CONNECTIONS BY L.S.M** Classification of Steel beams -Effective span- Design principles-Minimum thickness of Web-Design Strength in Bending/ Shear-Limiting deflection of beams - Lateral buckling of beams -Maximum permitted Slenderness Ratio- Plastic Moment of Resistance and Plastic Section Modulus of Sections- Shape Factor — Design of laterally supported Simple beams using single / double rolled steel sections (symmetrical cross sections only) (Built-up beams not included). Types of welds - Size, Effective area and Effective length of Fillet welds – Requirements of welds-Stresses in Welds – Design strength of fillet/ butt welds -- Lap and butt joints for angles only – Simple Problems - Procedure for design of welded connections for Plates and Angles (Theory only).

Topics and Allocation of Hours

UNIT	Topics	Hrs
I	Water Supply Engineering: Introduction, Quantity of Water, Source of Water, Intakes and conveyance	15
II	Quality of Water, Primary treatment of water, Filtration of water, Disinfection of water and water softening.	15
111	Distribution system and preparation of water supply scheme or	15
IV	Sanitary Engineering: Collection and conveyance of sewage, Seaware appurtenances.	14
V	Primary Treatment of water, Secondary treatment of water, solid waste disposal, sludge waste disposal and preparation of sanitary	14
	Test & Model Exam	7
	Total	80

RATIONALE:

Diploma holders in Civil Engineering are expected to supervise construction of water supply and waste water treatment works. They are also responsible for waste disposal activities. This subject aims at imparting skills for preparing water supply and waste water engineering drawings to develop competencies for reading the drawings, and their execution in their field. In addition, Civil Engineering diploma holders must have the knowledge of different types of environmental aspects due to development activities so that they may help in maintaining the ecological balance and control pollution. They should also be aware of the environmental laws for effectively combating environmental pollution.

OBJECTIVES:

On completion of the course, the student will be able to:

- Know the procedure of estimating water requirements for a water supplyscheme.
- Select suitable sources of water supply and pipe materials.
- Determine the quality of water, testing procedures and standards fordrinking water.
- Understand the methods of purification of water.
- Understand the systems of distribution for a water supply scheme.
- Understand the basic facts of sanitary engineering, the methods of collection and conveyance of sewage.
- Understand the primary and secondary treatment of sewage and disposal.
- Know the methods of disposal of sludge and solid wastes.
- Identify the various types of pollution and their prevention.
- Create awareness about environmental impact assessment.

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details	BTL
1E5307-CO1	Ability to evaluate Water Supply Engineering, Intakes	A_4
11 3307-001	and conveyance	A- 4
1E5307-CO2	Ability to estimate. Primary treatment of water, Filtration	11_2
11 3307-002	of water, Disinfection of water and water softening.	0-2
1E5307-CO3	Ability to Illustrate Distribution system and preparation	∆_2
11 3307-003	of water supply scheme orproject.	A- 2
1E5307-CO4	Ability to Understand Collection and conveyance of	11_2
11 3307-004	sewage,Seaware appurtenances.	0-2
1E5307-CO5	Ability to Understand Treatment of water, Secondary	11-2
11 0007-000	treatment of water, solid waste disposal,	0-2

DETAILED SYLLABUS

Contents: Theory

Unit	Name of the Topics	Hrs
	PART I - WATER SUPPLY ENGINEERING	3
	CHAPTER:1.1 INTRODUCTION	
	Water Supply – Salient Features of a Water Supply Scheme – Flow	
	Chart of a Water Supply Scheme- Agencies responsible for protected	
	water supply.	
	CHAPTER:1.2 QUANTILY OF WATER	
	Public Water Supply - Need for Protected Water Supply - Objectives of	4
	Capita Domand Dradiation of Depulation Droblems in	
	Arithmetical Increase Method Commetrical Increase Method	
I	Antimetical increase Method	
	CHAPTER:1 3 SOURCES OF WATER	3
	Sources of Water – Surface Sources – Underground Water	
	Sources-Selection of Source of Water	
	CHAPTER: 1.4 INTAKES AND CONVEYANCE	
	Intakes - Types of Intakes - Description of Intakes -Infiltration	-
	Galleries and Infiltration Wells in River Beds - Pipes for	5
	Conveyance of Water -Cast Iron, Steel, G.I., Cement Concrete,	
	R.C.C., Hume and PVC Pipes -Pipe Joints - Laying and Testing of	
	Pipe Lines.	
	CHAPTER:2.1 QUALITY OF WATER	3
	Impurities in Water - Testing of Water - Collection of Water Sample -	
	Physical, Chemical, Bacteriological Tests - Standards of Drinking	
	Water -Water Borne Diseases and their Causes.	
	CHAPTER:2.2 PRIMARY TREATMENT OF WATER	
	Object of Water Treatment – Flow Diagram of a Treatment	5
	Plant — Function of Units – Sedimentation – Purpose of	
	Sedimentation – Types of Sedimentation Tank – Coagulation –	
	Coagularits – Flocculation – Coagulation Process.	
	CHAPTER.2.3 FILTRATION OF WATER	
	Rapid Sand Filter - Pressure Filter - Comparison between slow	
	sand filter and ranid sand filter	2
	CHAPTER 2 4 DISINFECTION OF WATER AND WATER	3
	SOFTENING	
	Necessity of Disinfection – Methods of Disinfection – Chlorination –	
	Action of Chlorine — Methods of Chlorine — Forms of	4
	Chlorination –Water Softening – Necessity of Water Softening	-
	– Hardness – Types of Hardness – Effects of Hardness –	

	Removal of Hardness (names only) - Miscellaneous Water	
	treatment (names only) — Mineral water — requirements –	
	Treatment Process – Reverse of Osmosis (RO).	
ш	CHAPTER:3.1 DISTRIBUTION SYSTEM Distribution System - Methods of Distribution Gravity System, Pumping System, Combined System - Systems of Water Supply - Continuous and Intermittent Supply of Water -Layouts of Distribution - Dead End, Grid Iron, Radial and Circular Systems — Service Reservoirs - Types	7
	CHAPTER:3.2 PREPARATION OF WATER SUPPLY SCHEME OR PROJECT Reconnaissance of Survey – Demand of Water – Source of Water –Preparation of Topographical Map – Layout Map of the Scheme – Mapand Drawing to be Prepared – Office Work – Project Report.	8
IV	PART II – SANITARY ENGINEERING CHAPTER:4.1 COLLECTION AND CONVEYANCE OF SEWAGE Sanitation Purpose Terms - Systems of Sanitation - Quantity of Sewage - Variation in Rate of Flow of Sewage -Estimation of storm water - problems - Minimum Size of Sewer — Shapes of Sewer (names only) - Materials used for Sewer - Joints in Sewer Line - Laying and Testing of Sewer Lines – Ventilation of Sewers - Cleaning of Sewers.	7
	CHAPTER:4.2 SEWER APPURTENANCES Sewer Appurtenances Manhole - Lamp Hole - Catch Basin - Street - Inlet- Grease and Oil Trap - Flushing Tanks Drainage Arrangements in Buildings - Sanitary Fittings - Sewage Pumps Necessity - Types of Sewage Pumps (names only).	7
v	CHAPTER:5.1 PRIMARY TREATMENT OF SEWAGE: Introduction – Flow diagram of primary treatment-screens-Grit chambers-skimming tank-Primary sedimentation tank. CHAPTER:5.2 SECONDARY TREATMENT OF SEWAGE: Introduction-Flow diagram of secondary treatment-Function of units of secondary treatment-secondary sedimentation tank-filters-types- Trickling filters-activated sludge process-septic tanks for isolated buildings-construction and working of septic tanks-soak pits- dispersion trenches.	3 3
	CHAPTER:5.3 ENVIRONMENTAL POLLUTION AND SOLID WASTE DISPOSAL: Environment –definition-water pollution-sources of water pollution- effects of water pollution-control of water pollution-soil pollution- sources of soil pollution-effects of soil pollution-Control of soil pollution-Noise pollution-Source of noise pollution-effects of noise pollution-control of noise pollution-air pollution-sources of air pollution	5

– effects of air pollution on human beings, plants, animals, materials-	
air pollution-control equipment-control devices for particulate	
contaminants-environmental degradation-ozone layer depletion-solid	
waste disposal-Necessity-Method of solid waste disposal-dumping-	
sanitary landfill, composting-energy from waste-A study on	
construction and demolition waste.	
CHAPTER: 5.4 ENVIRONMENTAL IMPACT ASSESSMENT:	3
Environmental impact assessment (EIA)-Methodology of EIA-	
Organizing the jobperforming the assessment –preparation of	
environmental impact statement(EIS)-Review OF EIS-environmental	
risk assessment-limitation of EIA.

RATIONALE:

In civil engineering projects, RS and GIS techniques can become potential and Indispensable tools. Various civil engineering application areas include regional planning and site investigation, terrain mapping and analysis, water resources engineering, town planning and urban infrastructure development, transportation network analysis, landslide analysis, etc.

OBJECTIVES:

On completion of the course, the students will be able to:

- Understand the basic concepts of remote sensing.
- Know the applications of Geographic information systems in Civil Engineering.
- Identify the basic remote sensing concepts and its characteristics.
- Implement the photogrammetric concepts and fundamentals of Air photo.
- Interpretation Use various analysis and interpretation of GIS results.

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details	BTL			
1F5308.1-CO1	Ability to identify the fundamentals of remote sensing	U-2			
1F5308.1-CO2	Ability to determine the earth view by the photogrammetric surveying	A-3			
1F5308.1-CO3 Ability to analyze the image interpretation through photos					
1F5308.1-CO4 Ability to summarize the components, features of GIS					
1F5308.1-CO5	Ability to prepare maps for the interpretation the data				

 Legends: R = Remember U= Understand; A= Apply and above levels (BTL-Bloom's revised taxonomy Level

DETAILED SYLLABUS

Contents: Theory Unit Name of the Topics Hour S CHAPTER:1 FUNDAMENTALS OF REMOTE SENSING 15 L Basics of Remote Sensing: Definitions and its components – Energy Sources and Radiation principles - electromagnetic radiation (EMR) spectrum - wavelength regions important to remote sensing -Atmospheric scattering, absorption – Atmospheric windows – spectral signature concepts - typical spectral reflective characteristics of water, Vegetation and soil. characteristic of real remote sensing system, platforms, orbit types, sensors, resolution concept satellite,-Pay load description of important Indian Earth Resources and Meteorological Satellites. Ш **CHAPTER:2 PHOTOGRAMMETRY** 15 Geometric elements of a vertical photograph – Stereoscopic plotting instruments, Ortho photos, Flight planning **CHAPTER :3 IMAGE INTERPRETATION AND ANALYSIS** Fundamentals of Air-photo interpretation - Elements of image 15 interpretation, concepts of digital image processing image Rectification Ш and Restoration, Image enhancement, Image classification, Application of Remote sensing in Civil Engineering. **CHAPTER : 4 FUNDAMENTALS OF GIS** Basic Concepts of GIS – Basic spatial concepts –Coordinate Systems: Definitions - History of development of GIS - Components of GIS: 14 IV Hardware, Software, Data, People and Methods - Proprietary and open source Software - Types of data - Spatial, Attribute data types of attributes - scales/ levels of measurements -Data Base Management Systems. **CHAPTER :5 GIS - DATA ENTRY, STORAGE AND ANALYSIS** Data models - Vector and raster data – data compression – data input by digitization and scanning, data storage - attribute data analysis integrated data analysis- mapping concept - development of map 14 V Overlay, overlay operation - Errors and quality control. Land Information System (LIS)– Various GIS applications in Civil Engineering-Regional Planning and Site investigations, Hydrology and Water Resources Engineering, Transportation network analysis - Highway Alignments. **Test & Model Exam** 7hrs

111	Seepage Analysis and Seepage below Hydraulic Structures, Bearing Capacity and Settlement of foundations	15
IV	Foundations and Foundations in Expansive Soil	14
v	Machine Foundation and Foundations of Transmission Line Towers	14
	TOTAL	80

RATIONALE:

Civil Engineering diploma engineers are required to supervise the construction of roads and pavements, dams, embankments, and other Civil Engineering structures. As such, the knowledge of basic soil engineering is a pre-requisite for these engineers for effective discharge of their duties. This necessitates the introduction of Soil Engineering subject in the curriculum for Diploma Course in Civil Engineering. The subject covers only such topics as will enable the diploma engineers to identify and classify the different types of soils, their selection and proper use in the field for various types of engineering structures. The emphasis will be more on teaching practical aspects rather than theoretical concepts.

OBJECTIVES:

On completion of the course, the students will be able to:

- Learn the Properties of Soil, Classification and Strength of soils.
- Describe the Sub-soil Sampling.
- Understand the Seepage analysis, Bearing Capacity of soil and Settlement of Foundations.
- Learn the types of Foundations, Pile foundations and Pile Groups.
- Understand the Foundations on Expansive soil and Machine Foundations.
- Know about the Foundations of Transmission Line Towers

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details	BTL
1F5308.3-CO1	Ability to evaluate the soil mechanics & Hydraulic properties of soil	A-4
1F5308.3-CO2	Ability to Illustrate the classification and strength of soil , stabilization of soil and sub soil sampling.	A-3
1F5308.3-CO3	Ability to Analyze the seepage and seepage below hydraulic structures , bearing capacity and settlement of foundations	A-4

RATIONALE:

A diploma student in Civil Engineering requires knowing more about the concrete, which is one of the most important construction materials. This subject aims to improve the knowledge in the mix design and special types of concrete, to have the exposure of cracksin concrete structure and repairing, etc

OBJECTIVES:

On completion of this course, the students will be able to:

- Materials used.
- Admixtures used in concrete.
- Mix design method.
- Special and prestressed concrete.
- Forms works.
- Cracks and maintenance of concrete.

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details	
1F5308.2 -CO1	1F5308.2 -CO1 Ability to explain the Properties of Concrete, Production of Concrete and their Types of Concrete.	
1F5308.2 -CO1	Ability to summarize the admixtures and mix design of concrete.	U-2
1F5308.2 -CO1 Ability to describe the special type of concrete and its types and light weight concrete.		U-2
1F5308.2 -CO1	Ability to illustrate the prestressed concrete, form work and its applications.	U-2
1F5308.2 -CO1	Ability to explain the Cracks in Concrete Structure and their Prevention Joints, Repairs and Maintenance of Concrete	A-4

CIVIL ENGINEERING DRAWING ANDCAD PRACTICAL-II	6	96	25	100*	100	3 Hrs.

* Examinations will be conducted for 100 marks and it will be reduced to 75 marks.

RATIONALE:

Computers play a very vital role in present day life, more so, in all the professional life of engineering. In order to enable the students to use the computers effectively in drafting, this course offers Computer Aided Drafting of various drawings in Public Health Engineering, Bridge Engineering and Structural Engineering.

OBJECTIVES:

On completion of the course, the students will be able to:

- Prepare Public Health Engineering drawings manually
- Know about RCC and Steel bridge structures and draw manually
- Draw the Structural Engineering drawings using CAD,

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details	BTL
1F5402-CO1	Ability to understand Rapid Sand Filter, Septic Tank with dispersion Trench / Soak pit, R.C.C square overhead tank supported by four columns.	U-2
1F5402-CO2	Ability to create Steel Foot over bridge across a highway, Two span Tee Beam Bridge with square returns	U-2
1F5402-CO3	Ability to create Structural drawings using CADD.	A-4
1F5402-CO4	Ability to create Structural drawings using CADD.	C-6
1F5402-CO5	Ability to create Structural drawings using CADD.	C-6

Legends: R = Remember U= Understand; A= Apply and above levels (BTL-Bloom's revised taxonomy Level)

DETAILED SYLLABUS LIST OF EXPERIMENTS

PREPARATION OF DRAWINGS MANUALLY (Part I and II) AND USING CAD SOFTWARE (Part III)

I. PUBLIC HEALTH ENGINEERING

Draw plan and sectional views of the following:

- Rapid Sand Filter.
- Septic Tank with dispersion Trench / Soak pit.
- R.C.C square overhead tank supported by four columns

II. BRIDGE DRAWING

Draw plan and sectional views of the following:

- Steel Foot over bridge across a highway.
- Two span Tee Beam Bridge with square returns

III. STRUCTURAL ENGINEERING

Draw plan, cross section and longitudinal section

- Continuous one-way slab (with three equal spans).
- Simply supported two-way slab.
- Restrained two-way slab.
- Singly reinforced rectangular beam.
- Doubly reinforced Continuous beam (Rectangular beam with two spans).
- Tee Beams supporting continuous slab.
- Lintel and Sunshade.
- Dog-legged staircase.
- R.C.C. Column with square isolated footings.

AUTONOMOUS EXAMINATION

DETAILED ALLOCATION OF MARKS:

PART -& II	Manual Drawing	20Marks
	Section/Elevation	25 Marks
PART -& II	Plan/Elevation	25 Marks
	Plan/Cross section/Longitudinal section	25 Marks
	Viva voce	5 Marks
	Total	100Marks

Note:

- For all the drawings, detailed specifications shall be given. Designs are not to be included in the examinations. The drawings must include Layout plans, full plan, sections, etc., as applicable to each topic.
- For all the drawings, detailed specifications shall be given and students should draw in the drawing sheet based on the given specifications. The drawings to be drawn using computer and CAD Software.

LIST OF EQUIPMENTS (for a batch of 30 students):

S.No.	List of the Equipments	Quantity Required
1.	Computers	30 Nos.
2.	Laser printer	3 Nos.
3.	CAD software	30 Users

RATIONALE:

Diploma holders in Civil Engineering are expected to supervise construction of water supply and waste water treatment works. They are also responsible for waste disposal activities. This subject aims at imparting practical skills for testing of raw water, waste water and to study pollution control equipments to develop competencies for execution in their field.

OBJECTIVES:

On completion of the course, the student will be able to:

- Determine the quality of water, testing procedures and standards fordrinking water.
- Understand the Cutting, threading and joining of G.I.Pipes / cutting andpasting of PVC pipes using solvents.
- Make suction and delivery pipe connections to a centrifugal pump (makingindents, drawing a neat sketch of the connection with details).

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details	BTL
1F5309 -	Ability to Experiment the optimum coagulant value,	A 4
CO1	Electrometric method, Dissolved oxygen	A-4

RATIONALE:

Diploma holders in Civil Engineering are supposed to supervise the construction of buildings. To perform the above task, it is essential that students should have knowledge of various sub components of buildings like foundations, walls, roofs, stair cases, floors etc., and their constructional details. Therefore, the subject of concrete technology practical is very important for Civil Engineering diploma holders

OBJECTIVES:

On completion of the course, the student will be able to:

- Find the fineness setting time of cement.
- Know the shape tests and fineness for modulus coarse aggregate.
- Determine the bulking characteristics of sand.
- Determine the workability of concrete using slumpcone, compaction factor andVee Bee consistometer tests.
- Know the arrangement of steel reinforcement for concrete elements.
- Study the workability properties of self compacting concrete.

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details	BTL			
1F5310.2 - CO1	Ability to Determination of the fineness of cement by sieve analysis. Initial and final setting time of cement and normal				
1F5310.2- CO2	Ability to calculate Shape Test for coarse aggregate – Flakiness Index test. –Elongation Index test.Shape Test for coarse aggregate – Angularity number test.				
1F5310.2- CO3	Ability to Determine the building characteristics of given sand sample. Workability of concrete by slump cone test and compaction factor test.	C-6			
1F5310.2 -CO4	Ability to Determination of Fineness Modulus of fine aggregate and Fineness Modulus of coarse aggregate sample by conducting sieve analysis.	A-3			
1F5310.2- CO5	Ability to create Cutting, hooking, cranking and arrangement of reinforcement and Study of workability of self-compacting concrete.	C-6			

Legends: R = Remember U= Understand; A= Apply and above levels (BTL-Bloom's revised taxonomy Level)

DETAILED SYLLABUS

CONCRETE TECHNOLOGY PRACTICAL

Contents: Practical

LIST OF EXPERIMENTS

Total: 48 Hrs.

PART - A

- 1. Determination of the fineness of cement by Blains Permeability Apparatus or by sieveanalysis.
- 2. Initial and final setting time of cement with Vicat's Apparatus.
- 3. Determination of normal consistency of cement by Vicat's Apparatus.
- 4. Shape Test for coarse aggregate Flakiness Index test.
- 5. Shape Test for coarse aggregate –Elongation Index test.
- 6. Shape Test for coarse aggregate Angularity number test.
- 7. Determine the building characteristics of given sand sample.

PART - B

- 8. Determination of workability of concrete by slump cone test.
- 9. Determination of workability of concrete by compaction factor test.
- 10. Casting of concrete cube and compression test on concrete cube.

11. Determination of Fineness Modulus of fine aggregate sample and plot a particlesize distribution curve and also find the effective size and uniformity

co-efficient.

12. Determination of Fineness Modulus of coarse aggregate sample by conducting sieveanalysis.

13. Vee- Bee Consistometer Test on concrete test.

14. Study of workability of self compacting concrete

RATIONALE:

This subject is introduced to know the practical important of Geotechnical Engineering; the students studying this course will gain the knowledge in practical aspects which is directly linked to the construction of structures on different soil.

OBJECTIVES:

After completion of the course the students will be able to:

- Understand and determine physical and index properties of soil.
- Estimate the permeability and shear strength of soil.
- Compute optimum moisture content values for maximum dry density of soil throughvarious tests.
- Know the procedure for performing CBR test.
- Learn various compaction methods for soil stabilization.
- Study the SPT at construction site.

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details				
1F5310.3 -CO1	Ability to Identify rocks from the given specimen				
155310 3 002	Ability to Determine water content, shrinkage limit, grain	A 3

RATIONALE:

Development of a diploma curriculum is a dynamic process responsive to the society and reflecting the needs and aspiration of its learners. Fast changing society deserves changes in educational curriculum particularly to establish relevance to emerging socio-economic environments; to ensure equity of opportunity and participation and finally promoting concern for excellence. In this context the course on entrepreneurship and start ups aims at instilling and stimulating human urge for excellence by realizing individual potential for generating and putting to use the inputs, relevant to social prosperity and thereby ensure good means of living for every individual, provides jobs and develop Indian economy.

OBJECTIVES:

At the end of the course the students will be able to:

- Excite the students about entrepreneurship.
- Acquire Entrepreneurial spirit and resourcefulness.
- Understand the concept and process of entrepreneurship.
- Acquire entrepreneurial quality, competency and motivation.
- Learn the process and skills of creation and management of Entrepreneurial venture.
- Familiarize with various uses of human resource for earning dignified means of living.
- Know its contribution in and role in the growth and development of individual and the nation.

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CONCURRENT						
CARRIER	5	75	25	100*	100	3 Hre
DEVELOPMENT	5	75	25	100	100	51115.

Topics and Allocation of Hours:

UNIT	TOPICS	Hrs
	National Integration and Awareness	15
=	Social Awareness and Community Development	15
≡	Health and Hygiene	15
IV	Environmental awareness and Conservation	15
V	Traffic Control Organization	15
	TOTAL	75

Objectives:

1. To promote harmony and the spirit of common brotherhood amongst all the people of the country. To safe guard public property and abjure violence.

2. To develop the idea of ability and better thinking to work for the betterment of community.

3. To prevent illness and have positive health attitude, correct and complete knowledge of health is necessary.

4. To develop a world population that is aware of, and concerned about, the environmental and its associated problems.

5. To provide for the safe, rapid, comfortable efficient, convenient, and

environmentally compatible movement of people, goods, and services.

CO	Details	BTL
1F0007-CO1	Students to know the responsibility to see that injustice, inequality, oppression; exploitation, corruption, misuse of public money etc. are done away with. Students play a vital role in the society. They are the guardians of freedom, Justice, equality, ethics and social equilibrium.	U-2
1F0007-CO2	To understand social and ethical norms for behavior, and to recognize family, school, and community resources and supports.	U-2
1F0007-CO3	Students have the knowledge or skills to develop good personal hygiene habitson their own.	A-4
1F0007-CO4	To understand the fragility of our environment and the importance of itsprotection.	C-6
1F0007-CO5	The students will get a vast understanding on various traffic enforcementsrules and regulations.	C-6

DETAILED SYLLABUS

Contents: Theory

Unit	Name of the topic	Hrs
I	CHAPTER 1: National Integration and Awareness: Introduction – Importance of National Integration – Essence of national integration : Cultural Integration, Economic Integration, Political Integration, Religious Integration, Social Integration- Necessity of National Integration : Maintenance of peace and harmony, Growth and development of the nation, Law and Order, Culture and religious development, dignity and self respect, welfare and wellbeing of the people-Role of NCC in nation Building.	15
11	CHAPTER 2: Social Awareness and Community Development: Need of social awareness – Types of Social Awareness : Empathy, Organizational awareness- Service – How to build Social Awareness – Aims of Social Awareness – Different Social Awareness Programmes – Aims of Community development – Different community awareness programmes.	15
111	CHAPTER 3: Health and Hygiene: Introduction to the structure of the body – Personal hygiene - Food hygiene –water supply and its purification – Sanitisation –	15

	Waste Product/Refuse – Types of waste product – Sources of refuse – Collection an removal of refuse – Preventable diseases – Classification of disease – Preventive measures Yoga –Definition and meaning of Yoga-Principles of Yoga- Asana – Definition, Types, Benefits - Effect of various yogic practices on Respiratory and Circulatory system-Method of performing various asanas –Padmasana, Siddhasana, Gyan Muthra, Suryanamaskar. Physical and Mental heath –Elements of good health – Objectives and scopes of health education – Characteristics of healthy mind, Measures to secure mental health	
	CHAPTER 4:	15
	Environmental awareness and Conservation:	
	Introduction- Human activities and the environment – Depletion	
	and deterioration – Deforestation – Forest and wild life – Water	
N7	Resources – Global Warming – Depletion of Ozone layer – Role	
IV	of the NCC cadets towards the environment – Ecology –	
	cology Resource depletion Resource pollution	
	Environmental damage - Environment life and ecology -	
	Conservation measures – Methods of managements and	
	conservation of natural resources.	
	CHAPTER 5:	15
	Traffic Control Organization:	
	Understanding Road Safety – Importance or road safety: Major	
	causes of road accident – Role of Education sector in road	
V	safety - Role of general Community in road safety - Road	
	Safety tips – Safety Devices – Safe and Responsible driving :	
	Getting ready to drive before driving, Physical and mental	
	aleriness, know your venicle, know your blind spots, Fasten	
	conditions – Driving License	

ASSESSMENT:

This is a compulsory credit course. The assessment is to provide a fair state of development of the student, so participation in classroom discussions, etc. will be used in evaluation.

- Final marks = 25% of Assignment mark + 50% of Online exam mark (proctored) + 25 % of External exam (unproctored).
- Unproctored means candidate will be taking the exam from college.
- The overall pass percentage is 4

RATIONALE:

This is an applied engineering subject. The subject aims at imparting basic knowledge about construction planning and management, site organization, construction labour, control of work progress, inspection and quality control, accidents and safety and heavy construction equipment.

A good percentage of diploma engineers start working as small contractors. They require the knowledge of contractor ship, tendering and preparation of specifications for various types of jobs. Also diploma holders adopt valuers as their profession. To promote entrepreneurship amongst these engineers, knowledge and associated skills in the above field becomes essential. Hence this subject is of great importance to diploma engineers.

OBJECTIVES:

On completion of the course, the students will be able to:

- Describe the Role of government and construction agencies in the field of housing.
- Describe the organization set up of PWD.
- Mention the construction activity and fixing the construction agency.
- Describe the aspects of inspection and quality control methods.
- Describe the banking system.
- Carryout the Feasibility study of a project.
- Understand the process of Planning for civil engineering projects.
- Explain the significance of CPM and PERT Techniques.
- Understand the types of contract system.
- Study the organization chart of a construction company.
- Understand the concepts and requirement of Entrepreneurship.
- Perform the Computation of Net present value.

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

СО	Details	BTL
1F6311 -CO1	Ability to summarize the construction sector in India,	U-2
	planning for civil engineering project and contract	
	management.	
1F6311 -CO2	Ability to explain construction organization, departmental	A-3
	procedure and accounting.	
1F6311 -CO3	Ability to analyze the scheduling, time management and	A-4
	resource management.	
1F6311 -CO4	Ability to describe the quality management, construction	U-2
	disputes, human factors and labor legislation in	
	construction.	

1F6311 -CO5	Ability to describe the information management, computers	U-2
	and construction economics.	

Legends: R = Remember U= Understand; A= Apply and above levels (BTL-Bloom's revised taxonomy Level)

DETAILED SYLLABUS

	Itents: Theory				
Unit	Name of the topic	Hrs			
	CHAPTER:1.1				
	CONSTRUCTION SECTOR IN INDIA				
	Construction Management – Definition – Need-Scope-Objectives and				
	functions – Role of government and private construction agencies – Types of				
	construction sectors – Public and private functions of construction				
	Management in national development – Construction Practice – the owner,				
	consultant and contractor – Duties and Responsibilities – Various stages of a	5			
	construction project.				
	CHAPTER:1.2				
	FEASIBILITY STUDY				
	Study of necessity of project – Technical feasibility. Financial Feasibility.	4			
	Ecological feasibility. Resource feasibility. Recovery from the project.				
	Economic Analysis – Building Economics – Preliminary studies – Analysis –				
	Valuation.				
	CHAPTER:1.3	4			
I	PLANNING OF CIVIL ENGINEERING PROJECT				
	Objectives of planning – Public Project – Preliminary planning – Design				
	Factors – Site utilization – Reconnaissance survey – Preliminary survey –				
	Analysis and plotting of data – Estimate :Preliminary and detailed estimate –				
	project report – Land acquisition – Administrative approval – Technical				
	sanction – Budget, provision – Private project- Advantages of planning to				
	client and engineer – limitations – Stages of planning by owner and contractor				
	CHAPTER:1.4				
		5			
	Types of contracts – Contract documents – Contractual obligations –	•			
	Specifications – Tender Notice – Types – Tender Documents – Farnest				
	money deposit (FMD) and Security Deposits (SD) – Scrutiny and				
	acceptance of a tender – Contract agreement – Contractual changes and				
	termination of contract – Work order – Execution of agreement – Sub				
	Contract – Rights and duties of sub-contractor-BOOT contract -types				
	CHAPTER: 2.1 CONSTRUCTION ORGANISATIONS				
	AND THEIRSUPERINTENDENCE				
	Forms of business organizations - sole proprietorship — Partnership -				
	Joint stock company Co-operative society and State enterprises-				
	Advantages and Disadvantages -delegation of responsibility, personnel	10			
	requirements and division of works — Decentralization - Construction	-			

	supervision and Superintendence – Requirements and Responsibilities of	
	Executives of the project — Qualities of Efficient construction Manager -	
	Pay rolls and Records - Purchase and delivery of construction materials	
	and equipments – Percentage completion report	
	- Insurance record - Project office requirement - Organization chart of a	
	small / medium / large construction company (broad outline only).	
	CHAPTER : 2.2 DEPARTMENTAL PROCEDURE AND ACCOUNTING	
	Organization of P.W.D Responsibilities of officers - Accounting	
	procedure (administrative sanctions, technical sanctions, payment of bills) –	
	Imprest and Temporary accounts – Cash book - Works register -	
	Accounting for consumable materials - Record for tools and plants —	8
	Importance of M-book and its entries – Work charged establishment –	
	Nominal muster roll (N.M.R) – Daily labour reports (D.L.R)	
	CHAPTER : 3.1 SCHEDULING AND TIME MANAGEMENT	
	Scheduling — Definition — Preparation of Schedule — uses and	
	advantages – Classification of Schedules – Methods of scheduling –	
	Bar chart – Job layout – Work breakdown chart(WBC) – Network for	
	projects management — Activity — Event — Dummies — Basic	
	assumptions in creating a network – Rules for developing networks –	
	Fulckerson"s rule for numbering the events - Critical Path Method	
	Critical and Subcritical paths – Critical and Non critical activities/ events	
	– Significance of critical path – Simple Problems - PERT – Timeestimate	40
	- EST, EFT, LST, LFT - Earliest expected time - Latest allowable	10
- 111	occurrence time – Floats - Slack. Standard deviation - Variance – Simple	
	problems.	
	CHAPTER : 3.2 RESOURCE MANAGEMENT	
	Definition – Need for resource management – Optimum utilization	
	of resources- finance, materials, machinery, human resources - Resource	
	planning – Resource levelling and its objectives – Construction planning –	
	Stages – Operations – Schedule –Crashing – Need for crashing an activity	
	– Methods and tips for crashing – Time Vs Cost optimization curve – Cost	
	slope and its significance in crashing – simple problem on resource	8
	levelling (not for examination)-labour management in construction-Time-	
	cost –quality	
	CHAPTER : 4.1 QUALITY MANAGEMENT AND SAFETY:	6
	Importance of quality – Elements of quality – Quality Assurances	•
	Techniques (Inspection, Testing, sampling) - Importance of safety – Causes	
	of accidents – Role of various parties (Designer/Employer worker) in safety	
IV	management – Benefits – Approaches to improve safety in construction	
	CHAPTER · 4 2 CONSTRUCTION DISPUTES AND THEIR SETTI EMENT.	
	Introduction - Development of disputes - Categories of disputes - Modes of	
	- Settlements - Arbitration	2
		J
	CHAFTER : 4.3 CONSTRUCTION LABOUR AND LEGISLATION :	

	 Need for legislation – Payment of wages Act – Factories Act – Contract labour (Regulation and abolition)Act – Employees Provident (EPF) Act. CHAPTER : 4.3 ETHICS IN ENGINEERING: Human Values – Definition of Ethics – Engineering ethics – Engineering as a profession – Qualities of professional – Professional institutions – Code of ethics – Major ethical issues - Ethical judgment – Engineering and management decision – Value based ethics. 	4 5
v	ENTREPRENEURSHIP Definition – Role and Significance – Risks and Rewards – Concepts of Entrepreneurship — Profile and requirement of entrepreneur - Programmes existing in India – SISI, DIC, TANSIDCO – Funding and technical assistance to Entrepreneurship- NIDCO,ICICI,IDBI,IFCI,SFC. CHAPTER : 5.2 INFORMATION MANAGEMENT AND COMPUTERS Introduction – Definition of MIS – Out lines of MIS – Use of computers in construction industry – Requirements of MIS – A data base approach – Definition –Benefits - A data base approach to contractor"s account and its advantage – Basic concepts of estimation – Project management and operations simulation packages – Construction automation and Robotics.	5
	CHAPTER : 5.3FINANCIAL MANAGEMENTElements of cash flow – Time value of money – Interest rate of capital –Present value computation - NPV method – IRR method – simple problems -Global banking culture - Types of banks – Activities of Banks – Corporatefinance – Personal, retail and rural banking – Treasury management-CostAnalysis-Direct Cost –Indirect Cost-total cost.TEST AND MODEL	6

Topics and Allocation of Hours

UNIT	Торіс	Hrs.
I	Introduction, Approximate Estimates, Measurements and Material	18
	Requirement and Specification & report writing	
II	Preparation of Data and Rate Analysis	15
	Areas and Volumes, Embankments and Cuttings	15
IV	Stages of Detailed Estimates ,Detailed Estimate	26
V	Valuation and Rent Calculation	15
	Test & Model Exam	7
	Total	96

RATIONALE:

Diploma holders in Civil Engineering are supposed to prepare material estimates and cost estimates for various Civil Engineering works namely; buildings, irrigation works, public health works and roads etc. In addition, they must have basic knowledge regarding analysis of rates and contracting principles of valuation. Therefore, this subject has great importance for diploma holders in Civil Engineering.

OBJECTIVES:

On completion of the course, the students will be able to:

- Learn the procedure for estimating and costing of Civil Engineering works.
- To write specifications for various materials and for different items of works.
- Write Technical reports on the proposed projects.
- Perform rate analysis for various items of works using Standard data & Schedule of Rates.
- Prepare detailed estimate of quantities of various Items of works.
- Calculate the value of a building/ property; to fix rent for a building adopting suitable method.

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details	BTL	
156209 001	Ability to estimate the different types of building by	11.2	
11 0209-001	approximate methods.	0-2	
156209 002	Ability to analyze the rates for different item of works	Λ /	
16209-602	in the building.	A-4	
	Ability to illustrate the area and volumes of irregular		
1F6209-CO3	figures by various rules and determine the volume of	U-2	
	embankments of roads and tank bunds.		
156209 004	Ability to estimate the different types of residential	E 5	
11 0209-004	and commercial buildings.	□ □-3	
1F6209-CO5	Ability to analyze the value and rent of buildings	A-4	

Legends: R = Remember U= Understand; A= Apply and above levels (BTL-Bloom's revised taxonomy Level)

DETAILED SYLLABUS

Con	tents: Theory	
Unit	Name of the Topics	Hours
	CHAPTER: 1.1 INTRODUCTION: Estimation – Definition of Estimate – Approximate estimate – Detailed estimate - Revised estimate – Supplementary estimate – Sub estimate – Annual maintenance estimate – Repair estimate – Complete estimate. CHAPTER: 1.2 APPROXIMATE ESTIMATES: Approximate estimates – Types – Plinth area method – Cubical content	3
	 method – Service unit method – Typical bay method – Simple problems on preliminary estimate of a building project. CHAPTER: 1.3 MEASUREMENTS & MATERIAL REQUIREMENT: Units of measurements for works and materials – Degree of accuracy in 	
I	 measurements - Deduction for openings in masonry, plastering and white washing area – Painting co- efficient – out turn of works working out of materials requirements – cement, sand, bricks, aggregates etc based on thumb rules for different works. CHAPTER: 1.4 SPECIFICATION & REPORT WRITING: Specification – Necessity – Types of specifications – Essential requirements of specifications – Specifications for various items of 	5
	 works – steps involved in standard specification – Report writing – Points to be considered while writing a report – writing typical reports for works such as Buildings – Residential / Hospital / School Laying a village road Construction of a bridge 	7
	CHAPTER: 2.1 PREPARATION OF DATA Data – Theory – Main and sub data – Observed data – lead statement - Schedule of rates – Standard data book – Sundries – Lump sum provision – Preparation of data using standard data and schedule of rates:	5
II	CHAPTER: 2.2 RATE ANALYSIS: Brick and stone masonry – Lime concrete and cement concrete – Flooring works and weathering course – R.C. works for slab, sunshade, beam and column – Partition wall – Form works for beams and slabs – Road works, WBM and surface dressing – White washing and painting works – A.C. sheet roofing – Apron and revetment works in canals – Wall plastering – Ceiling plastering – Pointing – Plumbing and sanitary works in buildings.	10

	CHAPTER: 3.1.AREAS AND VOLUMES	
	Areas of regular and irregular sections- Computation of Areas of	6
	Irregular figures- End Ordinate rule, Mid Ordinate rule, Average	
	Ordinate rule, Trapezoidal rule, Simpson's rule- Problems- Volumes	
	of regular and irregular solids- Computation of Volumes of Irregular	
	solids- End Area rule. Mid Area rule. Average Area or Mean Area	
	rule. Trapezoidal rule. Simpson's or Prismoidal rule.	
	CHAPTER: 3.2.EMBANKMENTS AND CUTTINGS	9
	Areas of cross sections of embankments of roads, tank bunds etc –	
	Level Section and Two level Section-Areas of cross sections of	
	cuttings of canals, drains etc- Level Section and Two level Section-	
	Determination of Volume of Earth work in Embankment / Cutting with	
	level sections of varying heights/depths or with two level sections of	
	uniform height/ depth.	
	CHAPTER: 4STAGESOFDETAILEDESTIMATE:	
	Taking off Quantities –Systems – Trade system – Group system –	
	Advantages of group system – Methods – Long wall and Short wall	
	method – Centre line method – Preparation of data – Abstract estimate	
	– Lump sum provision and contingencies – Quantity surveyor – Duties –	
	Essential Qualities.	
	PreparedetailedestimateusingTradesystemandTakeoffquantitiesforallite	
IV	msofworksinthe following types of structures:	26
	• A small residential building with two / three rooms with RCC roof.	
	Two Storied building (framed structure)with RCC roof.	
	 Industrial buildings with AC/GI sheet roof with steel trusses. 	
	Community Hall with columns and T-beams.	
	Septic tanks with dispersion trench/ soak pit.	
	Rain water harvesting-Shallow recharge well.	
	R.C.C slab culvert.	
	Water Bound Macadam Road	
V	CHAPTER: 5.1 VALUATION	10
	Purpose of valuation – Types – Book value – Market value – Salvage	
	value – Scrap value – Depreciation – Obsolescence – Sinking fund –	
	Land valuation – Mortage & Lease – Problems on valuation – Annuity –	
	Definition & types only.	
	CHAPTER: 5.2 RENT CALCULATION	5
	Fixation of rent – Outgoing – Gross & Net income – Years" Purchase –	
	Capital cost – Standard rent – Market rent – Economical rent –	
	Problems on rent calculation.	
	Test & Model Exam	7hrs

RATIONALE:

On learning Sustainable and Green Building Materials, the students will be able to Identify various requirements for green building, use different steps in environmental impact assessment, relate the construction of green building with prevailing energy conservation policy and regulations, supervise the construction of green building construction using green materials and focus on criteria related to particular rating system for assessment of particular Green building.

OBJECTIVES:

After the completion of this course, the students will be able to:

- Know various aspects of green buildings.
- Use different steps involved in measuring environmental impact assessment.
- Relate the construction of green building with prevailing energy conservation policyand regulations.
- Know and identify different green building construction materials.
- Learn different rating systems and their criteria

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

RATIONALE:

Considerable employment opportunities are available in urban sector. This subject aims at imparting knowledge and skill in the Town Planning and surveys, urban roads and Traffic management, Master plan and Building bye laws which can be promoted for upgrading standards of life in urban areas.

OBJECTIVES:

On completion of the course, the students will be able to:

- Understand the principle of Town Planning and surveys.
- Know the requirements of housing and slum clearance.
- Learn the requirement of Public buildings, parks and play grounds.
- Understand the requirements and types of Urban roads and Traffic management.
- Know the Importance of housing and slum clearance programmes.
- Prepare Master plan and for Re-planning of existing Towns.
- Learn the Building bye laws and other miscellaneous topics.

DETAILED SYLLABUS

Contents:	Theory
-----------	--------

Unit	Name of the Topics	Hrs
	CHAPTER:1.1 TOWN PLANNING PRINCIPLES	7
	General - Evolution of planning - Objects of town planning –Economic	
	justification for town planning - Principles of Town planning - Necessity	
	of town planning - Origin of towns – Growth of towns – Stages in town	
	development - Personality of town -Distribution of land - Forms of	
	planning - Site for an ideal town - Requirements of new towns -	
	Planning of a modern town - Powers required for enforcement of Town	
	planning scheme - Cost of Town planning -Present position of Town	
I	Planning in India.	
	CHAPTER:1.2 SURVEYS	3
	General – Necessity - Collection of Data - Types of surveys for	
	planning a new town - Uses of surveys.	
	CHAPTER:1.3 ZONING	
	Meaning of the term - Uses of land, objects and Principles of Zoning -	5
	Advantages of Zoning - Importance of Zoning – Aspects of Zoning –	
	Iransition Zone – Economy of Zoning – Special Economic Zone (SEZ)	
	- Zoning powers - Maps for Zoning.	
	CHAPTER:2.1 HOUSING	7
	General - Importance of nousing - Demand for nouses - Building site -	
	Requirements of residential buildings -Classification of residential	
	buildings - Design of residential areas - Rural Housing - Agencies for	
	problems in India	
II	CHAPTER: 2.2 SILIMS	
	General - Causes of slums - Characteristics of slums - Effects of slums	8
	- Slum clearance - Problems in removing slums - Improvement Works	Ŭ
	Open plot scheme - Slum clearance and rehousing - Prevention of	
	slum formation - Resources for slum clearance programmes - The	
	Indian slums.	
	CHAPTER: 3.1 PUBLIC BUILDINGS	3
	General – Suitable Location of Public Buildings – Classification of	
	Public Buildings - Principles of design of public buildings – Town	
	centres - Grouping of public buildings – Requirements of Public	
	buildings – Green House– Civic aesthetics.	
III	CHAPTER: 3.2 PARKS AND PLAY GROUNDS	
	General – Types of recreation - Necessity of open spaces - Location of	4
	urban green spaces - Classification of parks – Park systems - Park	
	design – Finance for parks – Parkways – Playgrounds - Space	
	standards - Landscape architecture.	
	CHAPTER:3.3 MASTER PLAN	

	General – Objects – Necessity - Factors to be considered - Data to be	4
	collected - Drawings to be prepared - Features of master plan Planning	
	standards – Report – Stages of preparation – Method of Execution -	
	Conclusion.	
	CHAPTER:3.4 RE-PLANNING EXISTING TOWNS	4
	General - Objects of re-planning – Analyzing the defects of existing	
	towns - Data to be collected –difficulties in Master Planning existing	
	towns /cities - Urban renewal projects- merging of suburban areas-	
	Decentralization - Satellite Towns – Smart cities- definition and	
	features- Surface drains – Refuses of Towns – Refuse disposal	
	methods.	
IV	CHAPTER:4.1 URBAN ROADS	
	General - Objects - Requirements of good city road – Factors to be	
	considered – Classification of urban roads – Types of street systems -	<u> </u>
	Through and By-pass roads – Outer and inner ring roads -	ю
	Expressways – Freeways – Precincts - Road aesthetics.	
	CHAPTER:4.2 TRAFFIC MANAGEMENT	
	General - Object – Traffic survey - Traffic congestion – Traffic control -	
	Traffic diversion - Road junction –Parking - Traffic capacity of road -	
	One way traffic - Road traffic problems – Use of islands and flyovers at	
	crossings – causes of road accidents - Traffic signal – Advantages and	0
	disadvantages of Automatic Light signals – Road sign – Road marking	Ø
	- Name boards of streets- Direction boards - Street lighting in a town	
	 Traffic problem of existing towns. 	
V	CHAPTER:5.1 BUILDING BYE -LAWS	
	General - Objects of bye-laws - Importance of bye-laws - Function of	
	local authority - Responsibility of owner - Applicability of bye- laws -	
	Set-backs to buildings – Necessity of setbacks - Light plane	7
	- Plot coverage - Floor space index- Maximum Height of buildings -	
	Off-street parking – Fire protection - Minimum width of streets and plot	
	sizes – Some other terms - Principles underlying in framing building	
	bye- laws – Building bye-laws for residential area of a typical town	
	planning scheme – Building bye-laws for other types of buildings -	
	Development control rules - General rules of metropolitan Area -	
	CMDA rules.	
	CHAPTER: 5.2 MISCELLANEOUS TOPICS	
	Airports – Location - size - Noise control - Parts of an airports	
	- Betterment and compensation – City blocks –Conurbations - Cul- de-	7
	sac streets - Focal point - Green belt - Public utility services - Rapid	
	transit –Remote sensing application – Urban planning using remote	
	sensing – Site suitability analysis Location of Bus Terminus, Whole sale	
	markets, Exhibition Centres etc., - Location for water/sewage treatment	
	plants, location for waste disposal etc.,– Transportation planning.

Topics and Allocation of Hours

Unit	Topics	Hours
I	Introduction and Hydrology	15
II	Ground Water and Management of Ground Water	15
111	Rivers and River Training Works, Storage Works	15
IV	Distribution Works and Management of Canal Irrigation	14
V	Water Shed Management and Water Harvesting and Recycling	14
	Test & Model Exam	7
	Total	80

RATIONALE:

Diploma holders in civil engineering have to supervise the construction, repair and maintenance of canals, head works, river training works, cross drainage works, regulatory and other works. Some of the diploma holders are also engaged for preventing water logging and irrigation by tube wells. This subject imparts knowledge regarding hydrology, flow irrigation — storage and distribution system, constructional features of head works, river training works, cross drainage works, causes and prevention of water logging and construction of tube wells.

OBJECTIVES:

On completion of the course, the students will be able to:

- Understand water resource potential in India and need for water resourcemanagement.
- Understand the components of hydrological cycle and hydrograph.
- Understand the occurrence of ground water and ground water exploration methods.
- Understand the ground water basin management concept.
- Learn the classification of rivers and river training works.
- Know the different types of storage works and dam structures.
- Understand the distribution system of canals and management of canal irrigation.
- Understand the concept of water shed management including GIS approach.
- Learn the types of detention basins and reclamation of water logged lands.

•

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details	BTL
1F6312.3 -CO1	Ability to explain the hydrology	A-4
1F6312.3 -CO2	Ability to summarize the ground water and ground water management.	U-2
1F6312.3 -CO3	Ability to describe the types of rivers, river training works and storage works.	U-2
1F6312.3 -CO4	Ability to illustrate the distribution works and canal irrigation management.	U-2
1F6312.3 -CO5	Ability to explain water shed management and water harvesting and recycling.	A-4

Legends: R = Remember U= Understand; A= Apply and above levels (BTL-Bloom's revised taxonomy Level)

Contents: Theory				
Unit	Name of the Topics	Hrs		
I	CHAPTER:1.1 INTRODUCTION Water resources — world water inventory - Importance of water resources - Necessity for conservation and development of water resources — water resources of India - water resources management - purpose - factors involved in water resources management.	7		
	CHAPTER:1.2 HYDROLOGY Introduction — Definition - Application of Hydrology in engineering - Hydrological cycle - Precipitation — forms of Precipitation - measurements of rain fall - Rain gauge - types of rain gauges - rain gauge network — mean rainfall over a drainage basin — methods - Radar and Satellite Measurements of rainfall - runoff - Estimation ofrunoff - losses — Hydrograph — Unit Hydrograph — uses	8		
II	CHAPTER:2.1 GROUND WATER Ground water resources- zones of Ground water-Aquifer - types- terms used –porosity, permeability, yield, specific yield, specific retention, coefficient of storage, specific capacity — Darcy's law- measurement of yield of well -pumping test- recuperation test- ground water exploration –geo physical methods -Electrical resistivity method — seismic resistivity method- logs. CHAPTER:2.2 MANAGEMENT OF GROUND WATER	8		
	Concept of basin management - Ground water basin investigations - data collection and field work -mining yield - perennial yield - salt balance - basin management by conjunctive use - artificial recharge of Ground water - recharge methods.	7		
III	CHAPTER:3.1 RIVERS AND RIVER TRAINING WORKS Classification of river - Major rivers in India and Tamil Nadu -Inter linking of rivers in India and its importance — flood - flood forecasting - flood control in India. River training - objectives of river training - classification of river training - methods of river training — levees - guide banks — spurs — types - artificial cut- offs — launching apron - pitching of banks - pitched islands - miscellaneous methods.	7		

DETAILED SYLLABUS

	CHAPTER:3.2 STORAGE WORKS	8
	Surface storage - purpose of surface storage – tanks – types - tank weirs – tank outlet – reservoirs – types - storage capacity of reservoir - methods of determination of storage capacity of reservoir – reservoir losses – dams - classification of dams - selection of dam site - Earth dams – types - methods of construction- causes of failure of earth dam - remedial measures – spillway - types - spillway crest gates- types – sluiceway - types.	
IV	CHAPTER:4.1 DISTRIBUTION WORKS Irrigation Canal - Typical cross section of canal - components of canalsection - classification of canal -alignment of canal - canal head works types - components of diversion head works - cross drainage works types - canal losses - lining of canal – necessity - types of lining.	7
	CHAPTER:4.2 MANAGEMENT OF CANAL IRRIGATION	
	Canal irrigation system - Need for canal irrigation management - objectives of canal irrigation management - methods of improving canal irrigation management - cropping pattern - need for crop rotation - cropwater requirement - water delivery system - irrigation scheduling -frequency of irrigation - optimum use of irrigation water - irrigation efficiencies - conservation of water on the field - farmer's participation- irrigation manager-criteria for good canal irrigation management-channel capacity-canal lining-operation and maintenance of canal irrigation system.	7
V	CHAPTER:5.1 WATER SHED MANAGEMENT Water shed - classification of water sheds - integrated approach for water shed management - role of remote sensing and GIS in water shed management - soil and water conservation — Necessity - soil erosion — causes - effects — remedial measures against erosion - contour bunding - strip cropping - bench terracing — check dams - vegetated water way — afforestation - crop residue - land drainage - surface drains - sub	8
	surface drains. CHAPTER:5.2 WATER HARVESTING AND RECYCLING water harvesting - runoff collection - onsite detention basin - ponds - types - Seepage control – methods -evaporation control - Recycling of harvested water - waste water recharge for reuse — methods -water logging-remedial measures-soil reclamation- treatment and recycling of waste water for vegetation.	6
	Test & Model exam	7 Hrs.

SESHASAYEE INSTITUTE OF TECHNOLOGY (Autonomous), TRICHY-10 1: DIPLOMA IN CIVIL ENGINEERING SYLLABUS F-SCHEME

(To be implemented for the students admitted from the year 2020-21 onwards)

Programme Name	:	DIPLOMA IN CIVIL ENGINEERING
Course Code	:	1F6403
Term	:	V
Course Name PRACTICE	:	COMPUTER APPLICATIONS IN CIVIL ENGINEERING

TEACHING AND SCHEME OF EXAMINATION

No of weeks per semester: 16 weeks

Subject	Instructions		Examination				
	Hrs / Week	Hrs / Sem ester					
			Internal Assessment	Board Examinations	Total	Duration	
COMPUTER APPLICATIONS IN CIVIL ENGINEERING PRACTICE	4	64	25	100*	100	3 Hrs.	

* Examinations will be conducted for 100 marks and it will be reduced to 75 marks.

RATIONALE:

Computers play a very vital role in present day life, more so, in all the professional life of engineering. In order to enable the students use the computers effectively in problem solving, this course offers various engineering applications of computers in civil engineering.

OBJECTIVES:

On completion of the course, the students will be able to:

- Know about CAD commands.
- Understand building components.
- Draw building drawing using CAD software.
- Prepare approval drawing for submission to authority.

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details	BTL
1F6403-CO1	Ability to Prepare the Estimate sheet with given data (provide all the measurement details) and calculate the quantity using formula bar in MS Excel.	U-2
1F6403-CO2	Ability to Calculate Area and Elongation using Formula bar MS Excel.	U-2
1F6403-CO3	Ability to Generation of detailed drawings for given specification and Preparation of Bar Bending schedule using STAAD.Pro Software.	A-4
1F6403-CO4	Ability to develop the CPM / PERT Network for the proposed simple building project using MS Project Software	C-6
1F6403-CO5	Ability Develop Aerial map of given area using AUTOCAD MAP 3D Software.	C-6

Legends: R = Remember U= Understand; A= Apply and above levels (BTL-Bloom's revised taxonomy Level)

EXERCISE:

- 1. Prepare the Estimate sheet with given data (provide all the measurement details) and calculate the quantity using formula bar.
- 2. Prepare the Abstract sheet for the given data and calculate Amount and TotalAmount using Formula bar (Use separate column for rates and units)
- 3. Design and Analysis problems
- 4. Calculate Area and Elongation using Formula bar
- 5. Calculate Effective depth, d[°] and Area of Steel "A_{st} "using Formula Bar for given singly reinforced section.
- 6. For given dimension of Masonry/R.C.C Dam ie. Top width, bottom width, height of Dam, height of water, Specific weight of masonry/R.C.C., Sp.wt of Water etc,. Find thebase pressure and check the stability of the dam
- 7. Finding centre of gravity; I_{ZZ} and I_{YY} of I, L,T and channel sections
- 8. Preparation of Bar Bending schedule for a Continuous one way slab (with three equal spans) STAAD.Pro Software.
- 9. Preparation of Bar Bending schedule for a Simply supported two-way slab STAAD.Pro Software.
- 10. Preparation of Bar Bending schedule for a Restrained two way slab STAAD.Pro Software.

- 11. Preparation of Bar Bending schedule for a Singly reinforced rectangular beam STAAD.Pro Software.
- 12. Preparation of Bar Bending schedule for a Doubly reinforced rectangular contionous beam STAAD.Pro Software.
- 13. Preparation of Bar Bending schedule for a Dog-legged staircase STAAD.Pro Software.
- 14. Preparation of Bar Bending schedule for a R.C.C Column with square isolated footing STAAD.Pro Software.
- 15. Prepare the analysis of R.C.C structures using STAAD.Pro Software.
- 16. Prepare the design of R.C.C structures using STAAD.Pro Software.
- 17. Prepare CPM /PERT network gantt chart using MS project software.
- 18. Prepare aerial map using Q-GIS software.

AUTONOMOUS EXAMINATION SCHEME OF EXAMINATION:

In the examination the students have to be given two experiments one fromPart A and another from Part-B.

		Part - A	Part - B
S.No	Description	Max.Marks(40)	Max.Marks(55)
1.	Procedure	5	5

ESTIMATION AND COSTING LABORATORY	4	64	25	100*	100	3 Hrs.

No of weeks per semester: 16 weeks

* Examinations will be conducted for 100 marks and it will be reduced to 75 marks.

RATIONALE:

Estimation and Costing Lab deals with the procedure for estimating and costing of Civil Engineering works and to perform rate analysis for different items associated with construction projects.

OBJECTIVES:

After completing this course, students will be able to:

- Select modes of measurements for different items of works.
- Prepare detailed estimate of a civil engineering works.
- Use relevant software for estimating the quantities and cost of items of works.
- Justify rate for given items of work using rate analysis techniques

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details	BTL
1F6313.1 - CO1	Ability to prepare the detailed estimate for given material, labour wages, hire charges of tools & equipments	A-3
1F6313.1-CO2	Ability to measure the actual measurements of a given structure	E-5
1F6313.1 -CO3	Ability to calculate a detailed quantities for different items of a given building.	A-3
1F6313.1 -CO4	Ability to estimate the all engineering works.	U-2
1F6313.1-CO5	Ability to schedule the bar bending for the structural elements.	A-3

Legends: R = Remember U= Understand; A= Apply and above levels (BTL-Bloom's revised taxonomy Level)

DETAILED SYLLABUS

- Prepare the list of items to be executed with units for detailed estimate of a given structure from the given drawing.
- Prepare a report on market rates for given material, labour wages, hire charges of tools & equipments required to construct the given structure as mentioned in at Serial number 1 above.
- Recording in Measurement Book (MB) for any four items.
- Prepare bill of quantities of given item from actual measurements. (Any four items).
- Prepare approximate estimate for the given engineering works.
- Calculate the quantity of items of work from the given set of drawings using standard measurement sheet for load bearing residential structure using description of item from (1BHK Building with staircase).
- Prepare detailed estimate from the given set of drawings using "standard measurement and abstract format" for RCC framed structure using description of item (G+1 Building).
- Calculate the reinforcement quantities from the given set of drawings for a room size of 3 m x 4m with bar bending schedule.
- Prepare detailed estimate of bitumen road of one kilometer length from the given drawing.
- Prepare detailed estimate of small Septic tank from the given set of drawings.
- Prepare bar bending schedule for the given singly reinforced and doubly reinforced beams.

- Prepare bar bending schedule for the given continuous beam.
- Prepare bar bending schedule for the given one way slab.
- Prepare bar bending schedule for the given two way slab.
- Prepare bar bending schedule for the given square column and square footing

* Examinations will be conducted for 100 marks and it will be reduced to 75 marks.

RATIONALE:

In this course, the students learn about testing of aggregates, bitumen and preparing areport about roadwork's.

OBJECTIVES:

After the completion of this course, the students will be able to:

- Identify the types of roads as per IRC recommendations.
- Understand the geometrical design features of different highways.
- Perform different tests on road materials.

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

СО	Details	BTL
1F6313.2 -CO1	Ability to sketch the standard cross sections of Expressways, Freeways, NH/SH, MDR/ODR	A-3
1F6313.2 -CO2	Ability to Test the Flakiness and elongation index and angularity of aggregates.	E-5
1F6313.2 -CO3	Ability to Experiment softening point, penetration and Ductility of bitumen.	A-4

RATIONALE:

Diploma holders in civil engineering have to supervise the construction, repair and maintenance of canals, head works, river training works, cross drainage works, regulatory and other works. Some of the diploma holders are also engaged for preventing water logging and irrigation by tube wells. This subject imparts knowledge regarding hydrology, flow irrigation — storage and distribution system, constructional features of head works, river training works, cross drainage works, causes and prevention of water logging and construction of tube wells.

OBJECTIVES:

The following are the objectives of this course:

- To learn estimation of hydrological parameters.
- To understand water demand of crops and provisions to meet the same.
- To know planning of reservoirs and dams.
- To design irrigation projects, canals and other diversion works.

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	Details	BTL		
1F6313.3 -CO1	Ability to Calculate average rainfall for the given area using arithmetic mean method, isohyetal, Theissen polygon method.	A-3		
1F6313.3 –CO2	1F6313.3 – CO2 Ability to Estimate crop water requirement for the given data. Estimate capacity of the canal for the given data.

DETAILED SYLLABUS

WATER RESOURCES ENGINEERING LABORATORY

Contents: Practical

Exercise	List of Experiments	Hrs
1	Calculate average rainfall for the given area using arithmetic mean method.	
2	Calculate average rainfall for the given area using isohyetal, Theissen polygon method.	
3	Delineation of contributory area for the given outlet from the given topo-sheet.	

4	Estimate crop water requirement for the given data.				
5	Estimate capacity of the canal for the given data.				
6	Calculate reservoir capacity from the given data.				
7	Calculate control levels for the given data for a given reservoir.				
8	Draw a labeled sketch of the given masonry/earthen dam section.				
9	Draw the theoretical and practical profile of the given gravity dam section				
10	Prepare a presentation on the technical details of any one micro or minor irrigationscheme.				
11	Prepare a model of any irrigation structure using suitable material				
12	Prepare a maintenance report for any major/minor irrigation project site in the vicinityof your area, based on field visit.				
13	Prepare summary of the technical details of any existing water resource project inthe vicinity of your area.				
14	Draw a labeled sketch of the given diversion head works and Cross Drainage works.				
15	Design a canal section for the given conditions with estimation of the quantity ofmaterial required for lining.

RATIONALE:

The students of all the Diploma Courses have to do a Project Work as part of the Curriculum and in partial fulfillment for the award of Diploma by the State Board of Technical Education and Training, Tamil Nadu. In order to encourage students to do worthwhile and innovative projects, every year prizes are awarded for the best three projects i.e. institution wise, region wise and state wise.

As far as possible, the students should be given live project problems with a view to:

- Develop understanding regarding the size and scale of operations and nature of field work in which students are going to play their role after completing the courses of study.
- Develop understanding of subject based knowledge given in the classroom in the context of its application at work places.
- Develop first and experience and confidence amongst the students to enable them to use and apply polytechnic/institute based knowledge and skills to solve practical problems of the world of work.
- Develop special skills and abilities like interpersonal skills, communication

skills, attitudes and values.

OBJECTIVES:

The objective of the project work is to enable the students to work in convenient groups of not more than six members in a group on a project involving theoretical and experimental studies related to Civil Engineering. Every Project Work shall have a Guide who is a member of the faculty of Civil Engineering of the college. The hours allotted for this course shall be utilized by the students to receive directions from the Guide, on library reading, laboratory work, computer analysis or field work and also to present in periodical seminars the progress made in the project. Each student shall finally produce a comprehensive report covering background information, literature Survey, problem statement, Project work details and conclusions.

This experience of project work shall help the student in expanding his / her knowledge base and also provide opportunity to utilise the creative ability and inference capability.

- Implement the theoretical and practical knowledge gained through the curriculum into an application suitable for a real practical working environment preferably in an industrial environment
- Get exposure on industrial environment and its work ethics.
- Understand what entrepreneurship is and how to become an entrepreneur.
- Learn and understand the gap between the technological knowledge acquired through curriculum and the actual industrial need and to compensate it by acquiring additional knowledge as required.
- Carry out cooperative learning through synchronous guided discussions within the class in key dates, asynchronous document sharing and discussions, as well as to prepare collaborative edition of the final project report.
- Understand the facts and importance of environmental management.
- Understand and gain knowledge about disaster management

Course Outcome

On successful completion of the course, the students will be able to attain below Course Outcome (CO):

CO	CO Details	
1E6404-CO1 Ability to propose planning a project topic, necessity and description		C-6
1E6404-CO2	Ability to analyze the external loads, capacity.	A-4
1E6404-CO3	Ability to design the structures, discuss the results.	C-6

	Ability to estimate the quantity / cost of materials and	
1E6404-CO4	labour, result	E-5
	Discussion, conclusion, inference and scope of the project.	
156404 005	Ability to summarize the entrepreneurship and disaster	E 5
120404-005	management.	E-9

Legends: R = Remember U= Understand; A= Apply and above levels (BTL-Bloom's revised taxonomy Level)

WORKS INVOLVED IN PROJECT WORK:

Collection of Data from various Journals and Civil Engineering Magazines about the list of Projects given below- Select a suitable project based on the data collected and available resources in your locality -Surveyed Site Plan — Site particulars — Preparation of Architectural Drawings – soil type in the location – Specification for materials & construction procedure - Structural design — Preparation of Detailed Estimate, Data as per Current schedule of Rates -Abstract Estimate – Structural Drawings – Preparation of Report about the project.

IMPORTANT DOCUMENTS TO BE REFERRED FOR THE ABOVE ACTIVITIES:

S.No	Activity	Reference
1.	Preparation of Architectural	Building Regulations of Locality
	Drawings	National Building Code of India, etc
2.	Structural design,	Relevant IS code for
	Concrete	Masonry,Structures
	Reinforcement, Steel	IS 456 for Reinforced Cement Concrete
	etc.	Hand book on Concrete
		Reinforcementand Detailing (SP-34)
3.	Specification of material and	Construction procedure
	workprocedure as per State	byorganization, viz.
	Govt.	PWD
	Highways, Central Govt. Railways,	Construction procedure by
	etc	organizationviz. CPWD
		Specification by Architect etc.,

The Project work must be reviewed twice in the same semester. The project work is approved during the V semester by the properly constituted committee with guidelines.

a) INTERNAL ASSESSMENT:

The internal assessment should be calculated based on the review of the progress of thework done by the student periodically as follows:

Details of assessment	Period of assessment	Max.Marks	
First Review	6 th Week	10	
Second Review	12 th week	10	
Attendance	Entire semester	5	
Total		25	

b) EVALUATION FOR BOARD EXAMINATION:

Details of Mark allocation	Max. Marks
Demonstration/Presentation	25
Report	25
Viva Voce	30
Internship report	20
Total	100*

*Examination will be conducted for 100 marks and will be converted to 75 marks.

c) Internship Report:

The internship training for a period of two weeks shall be undergone by every candidate at the end of IV / V semester during vacation. The certificate shall be produced along with the internship report for evaluation. The evaluation of internship training shall be done along with final year "Project Work & Internship" for 20 marks. The internship shall be undertaken in any industry / Government or Private certified agencies which are in social sector / Govt. Skill Centres / Institutions / Schemes.

A neatly prepared PROJECT REPORT as per the format has to be submitted by individual student during the Project Work & Internship Board examination.

LIST OF SUGGESTED PROJECTS

COMPARATIVE STUDY

- Conventional and Composite concrete mixtures Light weight construction materialsPrefabricated and R.C.C. Structures
- Cost and construction procedures for steel and R.C.C. Structures.
- Cost and Construction procedures for Prestressed and R.C.C. Structures

ADMIXTURES

Economy of using fly ash in concrete

MIX DESIGN

Comparative study of mix design by different methods

STUDY OF SPECIAL TYPES OF CONCRETE IN CONSTRUCTION BY EXPERIMENTS

- Bamboo as a reinforcing material.
- Baggage ash concrete.
- Fly ash concrete.
- Concrete with Natural vegetative materials.
- Concrete using Plastic waste.
- Concrete using Steel slag.
- Concrete using factory wastes.
- Self Compacting concrete, Fabre reinforced concrete, Ferro cements products.

PAPER PROJECTS

- Residential Houses, Primary Health center, School Buildings, Guest House.
- Panchayat Union Office Building, Bank Building.
- Post Office Building, College Building, Hospital Building, Hotel Building, Hostel Building, Factory Building, Auditorium, Shopping Centre, Community Hall, Theatre.
- Market Building, Multistoried Car park, Rural Bus Stand, Stadium.
- Swimming Pool.
- Over head tank for a village, New village road with culvert, Small Bridge.
- Plate Girder Bridge.
- Septic Tank for a Colony.
- Other Civil Engineering related structures

ENVIRONMENTAL MANAGEMENT PROJECTS

- Treatment of Wastewater and recirculation for a Colony.
- Solid waste management in a Colony.
- Hydrological data Collection for a river basin/water shed Industrial effluent Collectionand analysis .

MISCELLANEOUS

- Rain water Harvesting system for buildings.
- Rain water Harvesting system for a small colony.
- Low cost Housing techniques.
- Rehabilitation of structures.

FORMAT FOR PREPARATION OF PROJECT REPORT

1. ARRANGEMENT OF CONTENTS:

The sequence in which the project report material should be arranged and bound should beas follows:

- 1. Cover Page & Title Page.
- 2. Bonafide Certificate.
- 3. Abstract.
- 4. Table of Contents.
- 5. List of Tables.

- 6. List of Figures.
- 7. List of Symbols, Abbreviations and Nomenclature.
- 8. Chapters.
- 9. Appendices.
- 10. References

The table and figures shall be introduced in the appropriate places.

2. PAGE DIMENSION AND BINDING SPECIFICATIONS:

The dimension of the project report should be in A4 size. The project report should be bound using flexible cover of the thick white art paper. The cover should be **printed inblack letters** and the text for printing should be identical

3. PREPARATION OF FORMAT:

Cover Page & Title Page – A specimen copy of the Cover page & Title page of the project report are given in **Appendix 1**.

Bonafide Certificate – The Bonafide Certificate shall be in double line spacing using Font Style Times New Roman and Font Size 14, as per the format in **Appendix 2.**

The certificate shall carry the guide's signature and shall be followed by the guide's name, academic designation (not any other responsibilities of administrative nature), department and full address of the institution where the supervisor has guided the student. The term '**GUIDE**' must be typed in capital letters between the guide's name and academic designation.

Abstract – Abstract should be one page synopsis of the project report typed double line spacing, Font Style Times New Roman and Font Size 14.

Table of Contents – The table of contents should list all material following it as well as any material which precedes it. The title page and Bonafide Certificate will not find a place among the items listed in the Table of Contents but the page numbers of which are in lower case Roman letters. One and a half spacing should be adopted for typing the matter under this head. A specimen copy of the Table of Contents of the project report is given in **Appendix 3**.

List of Tables – The list should use exactly the same captions as they appear above the tables in the text. One and a half spacing should be adopted for typing the matter under this head.

List of Figures – The list should use exactly the same captions as they appearbelow the figures in the text. One and a half spacing should be adopted for typing thematter under this head.

List of Symbols, Abbreviations and Nomenclature — One and a half spacing should be adopted or typing the matter under this head. Standard symbols, abbreviations etc. should be used.

Chapters – The chapters may be broadly divided into 3 parts

• Introductory chapter.

• Chapters developing the main theme of the project work such as **Objectives:**

- Collection of data and required survey work.
- Management and construction procedure.
- Resources scheduling and networking.
- Design details.
- Required drawing set.
- Utility to society if any and Conclusion

The main text will be divided into several chapters and each chapter may be further divided into several divisions and sub-divisions.

Each chapter should be given an appropriate title.

Tables and figures in a chapter should be placed in the immediate vicinity of thereference where they are cited.

Footnotes should be used sparingly. They should be typed single space and placed directly underneath in the very same page, which refers to the material they annotate.

Appendices – Appendices are provided to give supplementary information, which is included in the main text may serve as a distraction and cloud the central theme.

- Appendices should be numbered using Arabic numerals, e.g. Appendix 1, Appendix 2, etc.
- Appendices, Tables and References appearing in appendices should be numbered and referred to at appropriate places just as in the case of chapters.
- Appendices shall carry the title of the work reported and the same title shall bemade in the contents page also.

List of References –The listing of references should be typed 4 spaces below the heading "REFERENCES" in alphabetical order in single spacing left justified. The reference material should be listed in the alphabetical order of the first author. The name of the author/authors should be immediately followed by the year and other details.

A typical illustrative list given below relates to the citation example quoted above.

Reference:

- Code of practice for plain and reinforced concrete (fourth edition), IS456:2000, Bureauof India Standard, New Delhi.
- Neville, A. M., Concrete Technology, Fourth edition, Pearson Education, New Delhi.
- Handbook on concrete mixes (based on Indian Standards), SP: 23-1988, Bureau ofIndian Standards, New Delhi, India

Table and figures:

By the word Table, is meant tabulated numerical data in the body of the project report as well as in the appendices. All other non- verbal materials used in the body of the project work and appendices such as charts, graphs, maps, photographs and diagrams may be designated as figures.

Typing Instructions:

The impression on the typed copies should be black in colour. One and a half spacing should be used for typing the general text. The general text shall be typed in the Font style "Times New Roman" and Font size 12
